RE: Skana Aluminum  
Spill Report for SERTS ID 20221206NE36-1

Dear Mr. Heinze:

On December 5, 2022, Skana Aluminum released approximately 100 gallons of non-hazardous used oil at the Skana Aluminum facility at 2009 Mirro Drive, Manitowoc, Wisconsin. This release occurred from Skana Aluminum turning on a pump during a waste oil transfer to a disposal truck.

Upon discovery, the Safety-Kleen employee began immediate containment and cleanup of this release. The response conducted was the placement of absorbent sheets, absorbent socks, and granular material to contain and absorb the release.

Also on December 5, 2022, Clean Harbors Field Services dispatched a team of employees to complete recovery and cleanup of the spilled material. CHES crew returned on December 8, 2022 to complete the containerizing of the material.

- Additional absorbent pads, socks/booms and granular material were used to absorb and collect the spilled material.
- All of the used oil was contained to the concrete pad and grassy area. At no time was there a threat to human health or the environment.
- The absorbent materials and soils were collected and placed into drums for disposal. A total of eighteen 55-gallon drums were filled with this material.
- PID screening, visual, and olfactory field screening were completed on the excavation.
- All materials were shipped to Spring Grove Resource Recovery, Inc. in Cincinnati, OH (OHD000816629) which is owned by Clean Harbors.

Below is a brief outline of the incident:
