Subject: Well Abandonment Work Plan
Former Amoco Terminal Wells
BRRTS #02-16-000331, #02-16-117873, #02-16-297979
C Reiss Dock Property Redevelopment
Superior, Wisconsin

Dear Mr. Hunt:

C Reiss Coal (C Reiss) has proposed a comprehensive redevelopment of their vacant parcel (PID #048040101400) located north of the Winter Street industrial corridor access road in Superior, Wisconsin. Proposed redevelopment activities include site regrading, rail spur and barge dock materials handling, new infrastructure installation, road and operations building improvements, and berm construction using excavated soil from the redevelopment. Design plans for the proposed C Reiss parcel redevelopment and the Former Amoco well network are included as the attached **Figures 1A and 1B**. Redevelopment is scheduled to begin in late Spring 2023, and a work plan and request to manage material for the site during redevelopment, including contaminated soil, has been submitted as Form 4400-315 by Stantec Consulting Services Inc. (Stantec) and was approved by the Wisconsin Department of Natural Resources (WDNR) on February 17, 2023. This Well Abandonment Work Plan serves as an attachment to Form 4400-315 and includes a request to abandon existing monitoring and recovery wells and the Phase II LNAPL recovery system piping installed on the C Reiss parcel by Antea®Group on behalf of BP Products North America Inc. (BP). The abandonment of the monitoring and recovery wells and Phase II system piping is required to be completed before C Reiss parcel soil handling and redevelopment takes place.

In order to accommodate the proposed redevelopment plans for the C Reiss parcel, Stantec has requested that 24 existing monitoring and recovery wells (**Table 1**) and the Phase II system LNAPL recovery system piping be abandoned. These wells have been used to delineate the extent of the releases associated with the Former Amoco Terminal (BRRTS #02-16-000331), Barge Dock Manifold & AST (BRRTS #02-16-117873), and Barge Dock – OW Separator & Loading Rack (BRRTS #02-16-297979) and are located north of the Winter Street industrial corridor access road in public space and on the C Reiss parcel (**Figures 2 and 3**). All wells are proposed to be permanently abandoned and filled and sealed by Bergerson Caswell Inc (LIC #0398) using materials and methods as prescribed in NR 141.25, Wis. Adm. Code. The history and conditions of these wells are detailed in the contents of this memorandum. Due to the extensive investigation, delineation and stability of the extent of LNAPL and dissolved-phase benzene, these wells are proposed to be abandoned without replacement. **Tables 2 and 3** present Barge Dock well historical groundwater gauging data and groundwater sampling analytical results, respectively.

WELLS PROPOSED FOR ABANDONMENT: SUMMARY OF CONDITIONS AND DELINEATION

Twenty-four monitoring and recovery wells are proposed for abandonment to accommodate development activities on the C Reiss parcel (**Table 1**). A figure from the Materials Management Plan submitted by Stantec detailing the locations of wetland, railroad and slope, and road is shown in **Figure 1A and 1B**. Recent submittals by Antea Group have presented detailed analyses of the data associated with the wells proposed for abandonment and the extensive delineation, monitoring, and LNAPL recovery history that has been completed on the C Reiss parcel. These submittals include:

- *2022 Progress Report January – December 2022, January 31, 2023;*
- *Results and Analysis of Updated LNAPL Investigation, March 2, 2023.*

Of the (24) wells proposed for abandonment (8) wells have been historically LNAPL monitoring or recovery wells and (16) wells have been dissolved-phase benzene monitoring wells (**Table 1**). Addressing the proposed wells for abandonment from south to north across the redevelopment area of concern, Antea Group notes the following regarding the gauging/sampling history and downgradient delineation of this area:

Non-detect wells installed in public space south of the C Reiss parcel (MW-17, MW-31)

- MW-17
 - Located adjacent to the vertical migration transition zone with a 35-year monitoring history;
 - Sampled 47 times between September 1988 and August 2022;
 - No exceedances of five ug/L NR 141 benzene ES;
 - 45 of 47 sample results non-detect;
 - Delineated downgradient and sidegradient by non-detect wells MWT-2S and MW-52D;
 - Recommendation is to abandon the well without replacement due to the consistent non-detect analytical and extensive history of sampling;
 - Planned for abandonment due to location within the road.
- MW-31
 - Located east, sidegradient/upgradient of the benzene vertical migration transition zone with a 33-year monitoring history;
 - Sampled 46 times between July 1989 and August 2022;
 - No exceedances of five ug/L NR 141 benzene ES;
 - 45 of 46 sample results non-detect;
 - Delineated downgradient by MW-30 and MWT-2 well nests;
 - Recommendation is to abandon the well without replacement due to the consistent non-detect analytical and extensive history of sampling;
 - Planned for abandonment due to location within the railroad grade.

Eastern C Reiss Parcel, Rail Spur Area (MWAST-3, 4, 9; RWAST-2; MRW-5)

- MWAST-3
 - LNAPL AOC 6 delineation well with 19 year monitoring history;
 - 1,020 ug/L benzene during most recent sampling event in August 2022;
 - Delineated downgradient by non-detect well MWM-4;
 - Recommendation is to abandon the well without replacement due to downgradient dissolved-phase delineation at saved well MWM-4;
 - Planned for abandonment due to location under the railroad.

- MWAST-4
 - LNAPL AOC 6 LNAPL well with 19 year monitoring and LNAPL recovery history;
 - Delineated downgradient by non-detect monitoring well MWM-4 and upgradient/sidegradient MWAST-8 on the Former Amoco parcel;
 - Recommendation is to abandon the well without replacement due to reduced recent LNAPL recovery and downgradient dissolved-phase delineation at saved well MWM-4;
 - Planned for abandonment due to location within the railroad grade.
- MWAST-9
 - Located south of LNAPL AOC 9, low impact dissolved-phase delineation well with 19-year monitoring history;
 - Sampled 13 times between October 2003 and August 2022;
 - 22.3 ug/L benzene in August 2022 with five historical non-detect results;
 - Area-wide dissolved-phase delineation coverage exists at MW-30 well nest, MWT-2S, and MWM-4;
 - Recommendation is to abandon the well without replacement due to low-level dissolved phase detections and dissolved-phase delineation coverage at saved well MWM-4;
 - Planned for abandonment due to location within the railroad grade.
- MRW-5
 - LNAPL AOC 8 finger plume well with 11 year monitoring and LNAPL recovery history;
 - Delineated downgradient by non-detect monitoring well MW-48S and MW-48D, and LNAPL wells MRW-6 and LRMW-4;
 - Recommendation is to abandon the well without replacement due to reduced recent Phase II system LNAPL recovery and downgradient dissolved-phase delineation at saved wells MRW-6, MW-48S, and MW-48D;
 - Planned for abandonment due to location within the railroad grade.

Central Berm Area Wells (MW-33, MRW-7, 8, 9, 10; MWM-2, 2D, 3, 6)

- MW-33
 - Non-detect monitoring well with a 31-year monitoring history;
 - One benzene detection (0.6 ug/L) with 37 non-detect results;
 - Delineated sidegradient by non-detect MWT-2S and downgradient by MWM-7 (16.6 ug/L);
 - Recommendation is to abandon the well without replacement due to consistent non-detect dissolved phase concentrations;
 - Planned for abandonment due to location within the soil berm.
- MRW-7
 - LNAPL AOC 8 finger plume well with 11-year monitoring and LNAPL recovery history;
 - Delineated downgradient by non-detect monitoring wells MWM-10S and MW-48S, and LNAPL monitoring well MRW-6;
 - Redevelopment new road corridor and berm placement will surround this area;
 - Recommendation is to abandon the well without replacement due to reduced Phase II system LNAPL recovery and downgradient dissolved-phase delineation at MWM-10S and MW-48S;
 - Planned for abandonment due to location within the soil berm.
- MRW-8
 - LNAPL AOC 8 finger plume well with 11-year monitoring and LNAPL recovery history;
 - Delineated downgradient by non-detect monitoring wells MWM-10S and MW-45S, and low impact well MWM-7 (16.6 ug/L);

- Redevelopment new road corridor and berm placement will surround this area;
- Recommendation is to abandon the well without replacement due to reduced Phase II system LNAPL recovery and downgradient dissolved-phase delineation at MWM-10S and MWM-7;
- Planned for abandonment due to location within the soil berm.
- MRW-9
 - LNAPL AOC 8 finger plume well located within the center of the proposed berm with 11 year monitoring and LNAPL recovery history;
 - Delineated downgradient by non-detect monitoring wells MWM-10S and MW-45S, and low impact well MWM-7S (16.6 ug/L);
 - Redevelopment new road and berm placement will surround this area;
 - Recommendation is to abandon the well without replacement due to downgradient dissolved-phase delineation at MWM-10S and MW-45S;
 - Planned for abandonment due to location within the soil berm.
- MRW-10
 - LNAPL AOC 8 finger plume well located within the proposed redevelopment service road with 11-year monitoring and LNAPL recovery history;
 - Delineated downgradient by non-detect monitoring wells MWM-9RS, MWM-10S, and MW-45S, and low impact well MWM-7S (16.6 ug/L);
 - Redevelopment new road and berm placement surround this area;
 - Recommendation is to abandon the well without replacement due to downgradient dissolved-phase delineation at MWM-10S and MWM-7;
 - Planned for abandonment due to location within the soil berm.
- MWM-3
 - LNAPL AOC 8 finger plume well located within the center of the proposed berm with 19-year monitoring and LNAPL recovery history;
 - Delineated downgradient by non-detect monitoring wells MWM-10S and MW-48S, low impact well MWM-7S, and LNAPL monitoring well MRW-6;
 - Redevelopment new road corridor and berm placement surround this area;
 - Recommendation is to abandon the well without replacement due to reduced Phase II system LNAPL recovery and downgradient dissolved-phase delineation at MWM-10S and MWM-7;
 - Planned for abandonment due to location within the soil berm.
- MWM-6
 - LNAPL AOC 8 finger plume well located within the proposed redevelopment service road with 19-year monitoring and LNAPL recovery history;
 - Delineated downgradient by the MWM-7 and MW-37 well nests;
 - Redevelopment new road corridor and berm placement surround this area;
 - Recommendation is to abandon the well without replacement due to limited LNAPL thicknesses and downgradient dissolved-phase delineation at MWM-7 and MW-37;
 - Planned for abandonment due to location within the soil berm.

Non-Detect, Low Impact Perimeter Wells (MW-49S, 49D, MWRR-1, 1D, MWOW-2, 2D, MWBD-1, 1D, 1DD)

- MW-49S/MW-49D Well Nest
 - Northern parcel well nest with 6-year monitoring history;
 - MW-49S has been below the five ug/L NR 140 benzene ES 6 of the last 8 rounds of sampling;
 - MW-49D has been non-detect for benzene during the last six sampling events;
 - Well nest is located near the proposed service road, office building, and stormwater pond;

- Recommendation is to abandon the well without replacement due to consistent concentrations below the NR 140 ES;
- Planned for abandonment due to location within a parking lot.
- MWRR-1/MWRR-1D Well Nest
 - Northern parcel well nest with 19-year (MWRR-1) and 4-year (MWRR-1D) monitoring history;
 - MWRR-1 has been sampled 17 times during the period October 2003 through August 2022 with five of the last 9 results non-detect for benzene;
 - MWRR-1D has been sampled 11 times during the period June 2018 through November 2022 with benzene detection results ranging from 50.6 ug/L to 510 ug/L; the most recent result in November 2022 was 270 ug/L;
 - The MWRR-1 well nest is located near the former Murphy Oil UST and oil/water separator and may have drilled into contamination related to this historical release activity in this area;
 - The MWRR-1 well nest is located near the proposed service road and rail spur;
 - Recommendation is to abandon the wells without replacement due to decreasing dissolved-phase concentrations.
 - Planned for abandonment due to location within the railroad grade.
- MWOW-2/MWOW-2D Well Nest
 - Northern parcel well nest with 19-year (MWOW-2) and 4-year (MWOW-2D) monitoring history;
 - MWOW-2 has been sampled 17 times during the period October 2003 through August 2022 with the last 13 rounds of sampling below the NR 140 ES for benzene including four non-detect results;
 - MWOW-2D has been sampled 10 times during the period June 2018 through November 2022 and all benzene results have been non detect;
 - The MWOW-2 well nest delineate dissolved-phase groundwater conditions downgradient of LNAPL AOCs 11, 12, and 13 which have demonstrated low benzene content during LNAPL characteristic testing;
 - The MWRR-1 well nest is located within the proposed rail spur development;
 - Recommendation is to abandon the well without replacement due to consistent non-detect dissolved-phase concentrations.
 - Planned for abandonment due to location within the railroad grade.
- MWBD-1/MWBD-1D/MWBD-1DD Well Nest
 - Northern parcel well nest with 9-year (MWBD-1), 8-year (MWBD-1D), and 4-year (MWBD-1DD) monitoring history;
 - MWBD-1 has been sampled eight times during the period October 2003 through August 2022 with all results non-detect for benzene;
 - MWBD-1D has been sampled 18 times during the period October 2014 through November 2022 with benzene exhibiting a decreasing trend from a historical high of 213 ug/L in May 2016 to 61.5 ug/L in August 2022;
 - MWBD-1DD has been sampled five times during the period June 2018 through August 2022 with all benzene results non-detect;
 - The MWBD-1 well nest delineates dissolved-phase groundwater conditions downgradient of LNAPL AOCs 11, 12, and 13 which have demonstrated low benzene content during LNAPL characteristic testing;
 - Recommendation is to abandon the wells without replacement due to vertical dissolved-phase delineation and consistent decreasing concentrations at MWBD-1D;

- Planned for abandonment due to location within the concrete tiles storage area.

SUMMARY AND CONCLUSIONS

To accommodate redevelopment of the C Reiss parcel, Antea Group proposes abandonment of 24 monitoring and recovery wells (**Table 1**). Based on the below conclusions, Antea Group recommends that the wells be abandoned without replacement:

- The C Reiss parcel has been thoroughly assessed over the past 20 years;
- Key wells located on the C Reiss parcel monitoring the transition of dissolved-phase benzene from the shallow well network to the vertical well network will remain in place including the MW-32 well cluster, MW-30 well nest, MWT-2 well nest, and MWM-7;
- Well monitoring coverage remains in the finger plume area with the preservation of MWM-4 and MRW-6;
- The LNAPL extents of AOC 6 and AOC 8 (finger plume) have been well delineated by the decades long monitoring of the groundwater and recovery well networks and multiple rounds of supplemental delineation including two comprehensive CPT-LIF events;
- The extensive horizontal and vertical well network that remains on the Former Amoco, C Reiss, and Hallett Dock parcels provides adequate monitoring coverage across the groundwater attenuation monitoring area of concern;
- Downgradient of the C Reiss parcel there are multiple lines of horizontal and vertical monitoring wells, parallel to groundwater flow direction, monitoring groundwater conditions between the LNAPL benzene source area on the Terminal and surface water;
- The residual LNAPL has been demonstrated to be depleted of light end hydrocarbons, including benzene, fully delineated, and immobile;
- The preponderance of groundwater monitoring wells exhibit stable or decreasing benzene concentrations and Ricker Plume Stability analysis presented in Antea Group's March 2023 *Results and Analysis of Updated LNAPL Investigation* demonstrates the average dissolved-phase benzene plume concentration in the vertical well network is decreasing over time;
- Redevelopment of the C Reiss parcel precludes drilling in many areas due to rail, road, and other commercial improvements; a comprehensive horizontal and vertical well monitoring network remains across the Amoco, C Reiss and Hallett Dock parcels and well abandonment without replacement is recommended;
- The Phase II LNAPL recovery system piping located on the C Reiss parcel will be removed and properly disposed of; the treatment compound system components and piping remaining on the Former Amoco property will be left in place for potential use in the future.

Antea Group requests the review and response to this work plan, along with the soil handling plan submitted for the C Reiss parcel redevelopment (Form 4400-315 and fee, submitted under separate cover) to include a written response indicating the Wisconsin Department of Natural Resources approval for abandonment of 24 monitoring and recovery wells and Phase II system LNAPL recovery system piping without replacement. Redevelopment of the C Reiss parcel is anticipated to begin in May 2023 pending contractor selection.

Notes:

Results in bold exceed applicable action limits

NGV = No given value

< = Not detected at or above indicated laboratory reporting limit

J = Laboratory estimated concentration above adjusted method detection limit and below adjusted reporting limit

ug/L = micrograms/liter
