Brad,
Thanks for the update.

Upon completion of the work, a construction documentation report compliant with NR 724.15 with PE stamp is required to be submitted.

If you have any questions feel free to ask.

Yes, the maintenance was completed in November. We're just waiting for winter to officially end and start putting together a watering schedule.

Cory,

Just a follow-up to the cap repair at the FedEx facility in Superior WI.

Last November a repair plan was submitted to the DNR by Justin Button-Hutchens of the BBJ Group indicating work would commence this spring.

Now that winter is winding down, do you have a schedule for construction activities?
