Hello Caroline,

Enbridge is planning to have the below interim field activities at the Cambridge Station (BRRTS Site 02-28-595980) next week (week of 1/13/2025).

- Residential private water well sampling is planned for Wednesday (1/15) at W8596 US Hwy 18.
 - Sample to be analyzed for Volatile Organic Compounds (VOCs).
- A round of shallow groundwater sampling is planned at:
 - Existing onsite monitoring wells MW-1, MW-2, MW-3, and MW-4R.
 - Sampling at the wells will be completed via low-flow sampling methods and analyzed for VOCs and Total Petroleum Hydrocarbons (TPH) as Diesel Range Organics (DRO) and Oil Range Organics (ORO).
 - Twelve (12) onsite temporary monitoring wells that were advanced during GeoProbe investigation activities in December.
 - Samples will be collected via grab methods from boring locations SB-01 through SB-12. These locations include the outer perimeter locations at the site.
 - Samples will be analyzed for VOCs and TPH as DRO/ORO.
- The Cambridge Station potable water well will also be sampled.
 - Sampling will be completed via low-flow methods and analyzed for VOCs and TPH as DRO/ORO.

All samples will be relinquished to Pace Analytical of Green Bay, Wisconsin for analysis.

Regards,

-shane
