RE: BRRTS # 02-28-595980 Cambridge Station – Request for Guidance
Potable Water Monitoring Distance from Remediation Site

Dear Caroline,

Enbridge has offered potable well testing to residents adjacent to the Cambridge Station remediation site to prudently monitor nearby water wells as part of the ongoing remedial site activities. At the recent Oakland community meeting, several residents were concerned about conducting water well sampling at residences further away from the Cambridge Station. To address community concerns, Enbridge is requesting guidance from the DNR in collaboration with the Jefferson County Health Department to review and recommend the appropriate potable water well monitoring radius considering site conditions including groundwater flow direction. Your assistance with this matter is greatly appreciated.

Sincerely,

A handwritten signature in blue ink that reads 'Shane Yokom'.
