**Subject:** Summary of July 5, 2017 Call for Lesperance and White Property cases

Hi Lynn,

Just wanted to summarize the main points quickly from our call on July 5, 2017.

- As discussed the review for the SI Report will have to be paused until results from the adjacent sediment investigation is received, of which samples will be collected in the river adjacent to the Lesperance and White Properties. This was addressed in the SI Not Approved letter issued on June 9, 2016. The sediment investigation is supposed to begin in the first week in August 2017.
- You were going to look into options on what can be done with the industrial direct contact exceedance on the east end of the Lesperance property. If further sampling is done in that area, there is an opportunity that less of the property would need a cover.

These were the main points. If you have questions, please let me know.

Have a nice weekend,

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
