Dear Mr. Drews:

Per the approved Work Plan dated May 3, 2019, the following is a monthly update of the status of the soil vapor intrusion study work associated with the above referenced site since the previous monthly status summary:

- Tables 1A through 1F summarize the status of all residential properties and Table 2 summarizes the status of all commercial properties. Attachment 1 includes complete tables of indoor air and sub-slab vapor sampling data to date. At this point the table has been reduced to focusing only on trichloroethene data as requested by WDNR.
- Residential property status summary is as follows:
  - o Total number of residential properties (excluding 4 vacant lots) 99
  - o Received signed agreements: 68
    - Installed SSDS: 37
    - SSDS Installations Being Scheduled 1
    - Previously Existing SSDS Systems Installed by Others 3
  - o In discussions/process of signing: 5
  - o Denials: 6
  - o No response: 20

Of the 13 properties identified in the 9/11/19 site visit list for pre-emptive installations, five sub-slab depressurization systems (SSDSs) have been installed, one existing system (installed by Others) was inspected, repaired and restarted. Of the four properties requested by WDNR for pre-emptive installations due to sub-slab vapor accumulations identified in the 8/14/19 meeting/conference call summary letter, three installations have been completed and one is still in the process of being

SSDS design testing was performed at the facility to assist with appropriate system design. The overall system is scheduled to be installed the week of August 3, 2020. In the meantime three carbon air filters have been set up within the facility as noted in last month's progress report.

- Figure 1 illustrates the status of all properties. No changes since last month.
- Access agreements to be signed but not yet received based on telephone discussions and/or meetings. Bold designation is address in pre-emptive installation defined core area:

Asked the high volume purge sampling be performed when he has moved his equipment out which was expected for the mid-March timeframe. After postponements, met with him on 4-4-19. Indicated that he is selling the property and that new owner (we talked to the Phase I ESA consultant in March) is willing to have us complete the work after transaction. He will be providing to us the new owner information. Information never provided, see that it is an in-home nursing care office (At Home Caring Angels). Get new owner information from County Tax Assessor map. Send letter, 3/5/20 Cathy (owner) calls about letter. Wants to verify no cost to her even for system install if needed. I said correct except for electrical draw. Will sign and send in agreement, 3/9/20 received signed agreement, called Cathy and set up site meeting for Wednesday 3/11/20. Set sampling schedule for 3/25-26, 2020. Sampling cancelled due to Governor's Safer At Home Emergency Order #12. Will rescheduled for end of April or earlier if Order is rescinded, 5/28/20 contact owner. Set up sampling, 6/22/20 received sampling results indicating indoor air exceedances and one sub-slab exceedance. Contact owner that afternoon to discuss and set up meeting for 6/23/20 to discuss further. offer carbon units to be set up that afternoon but owner said to wait until morning meeting. 6/24/20 meet with owner and also set up three carbon units, two within administrative area and one in front garage work area. Set up site meeting for 6/25/20 with SSDS install contractor to get an estimate for installation. 7/13/20 Completed sub-slab pressure field extension testing to assist in design of system. SSDS scheduled for installation 8/4/20. |

Since this is an auto repair shop he is concerned on what we might find and potentially get pulled into the process. He indicated that he wants to talk to his attorney and would get back to us. Will probably want any sampling limited to CVOCs. After not hearing back, two additional letters sent and then a WDNR letter sent 3/27/19. 3/29/19 received call with request for another meeting. Met with owner on 4/4/19 and basically had the same discussion as in October. He has not yet talked to an attorney. Said he will not sign until he does that. Has not committed to a timeframe to respond. 9/11/19 site visit with WDNR, spoke with Thomas, left packet, he will likely not sign without guarantee of property value among other reasons.   |

In discussions with tenant for scope and schedule. Met with operator 8/7/19, Agreed upon where points will be installed and working on when it will work best for their schedule to do the work. Installed and sampled 5 HV points 10/21/19 - 10/23/19. Elliot Erickson called 10/25/19, PA returned call 10/28/19 with project update. On 11/20/19 KPRG submitted a Heale Manufacturing Data Transmittal to WDNR. 1/27/20 received call from property owner asking when we will abandon the sampling points. Said we are waiting for answer from WDNR if our initial testing was sufficient. Contacted Mark Drews. He indicates they are still preparing a response and waiting for Pam Mylotta review. 2/10/20 WDNR issues a review letter of the 11/20/19 data submittal. The WDNR noted 5 comments that it would like addressed, KPRG/Navistar are in process of responding to the comments. 4/28/20 responses provided to WDNR. Owner made note that there is no basement in this structure. A KPRG drive-by indicates this is an small auto repair shop/garage. 6/18/18 called and talked with Gary Higbee and indicated that this study is not just meant for basements and that vapor can enter though floor slab of grade type construction. He indicated that at this time he will pass on this. I indicated that he will get a letter from WDNR recommending that he reconsider. He said he may do so at that time.   |

Notes: All values are in ug/m<sup>3</sup>.

VRSL - Vapor Risk Screening Level = 70 ug/m<sup>3</sup>.

Bold - Result exceeds the VRSL

A3 - The sample was analyzed by serial dilution.

IS - The internal standard response is below criteria. Results may be biased high.

J - Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.
