WDNR BRRTS Activity # 02-68-098404, WDNR FID # 268005430

Dear Mr. Alido:

The Wisconsin Department of Natural Resources (DNR) received the above "Southwest Parking Lot Remedial Action Options/Interim Action Plan" dated May 29, 2020 from KPRG. Additional information was received by DNR on July 29, 2020 which documents modifications to the proposed vapor extraction system. The DNR reviews environmental investigation and remediation cases for compliance with state statutes and rules to maintain consistency in the investigation and remediation of these cases.

After review of the above report, DNR is conditionally approving the Interim Action Plan, however additional remedial activities will be required to decrease the groundwater concentrations on and off-site. Determine if an Air Permit is needed prior to discharging of air and vapors from the proposed vapor extraction system. Collect soil samples from the remedial excavation to document soil concentrations after soil removal. Provide a Remedial Documentation Report after the construction of the remediation system and replacement of the storm sewer piping. Additional remedial activities may be required based on the results of the site investigation and this Interim Action Plan.

Until the site investigation and closure requirements have been met, your site will remain "open" and you also will need to continue to submit the semi-annual progress reports, as required by s. NR 711(1), Wis. Adm. Code.

If you have any questions regarding this letter, please contact me at 262-574-2146 or by e-mail at [mark.drews@wisconsin.gov](mailto:mark.drews@wisconsin.gov).

Sincerely,

Mark Drews  
Remediation & Redevelopment Program
