KPRG Project No. 11717

Re: Former Navistar/RMG Foundry
1401 Perkins Avenue, Waukesha, WI
BRRTS# 02-68-098404

Dear Mr. Drews:

Per the approved Work Plan dated May 3, 2019, the following is a monthly update of the status of the soil vapor intrusion study work associated with the above referenced site since the previous monthly status summary:

- Tables 1A through 1F summarize the status of all residential properties and Table 2 summarizes the status of all commercial properties. Attachment 1 includes complete tables of indoor air and sub-slab vapor sampling data to date. At this point, the table has been reduced to focusing only on trichloroethene (TCE) data as requested by Wisconsin Department of Natural Resources (WDNR).
- Residential property status summary is as follows:
 - Total number of residential properties (excluding vacant lots) - 99
 - Received signed agreements: 79
 - Installed SSDS: 43
 - SSDS Installations Being Scheduled - 1
 - Previously Existing SSDS Systems Installed by Others – 3
 - In discussions/process of signing: 0
 - Denials: 5
 - No response: 15

Of the 13 properties identified in the 9/11/19 site visit list for pre-emptive installations, six sub-slab depressurization systems (SSDSs) have been installed, one existing system

(installed by Others) was inspected, repaired and restarted. Of the four properties requested by WDNR for pre-emptive installations due to sub-slab vapor accumulations identified in the 8/14/19 meeting/conference call summary letter, three installations have been completed and one is still in the process of being scheduled (901 Eales Avenue). It is noted that the property owner of 901 Eales Avenue has been non-responsive to numerous phone calls and follow-up mail correspondence regarding a request to set a date for the installation. Additional letters were sent out in March and June 2021 and February 2022 with no response to date.

- In July, KPRG provided support to the WDNR and Wisconsin Department of Human Services (DHS) for their visits to non-responsive property owners and property owners who previously denied access for vapor sampling. The site visits were completed by WDNR/DHS on July 12, 2022. One new access agreement was received in August 2022 as a result of these visits. This was:
 - 904 Regent Street – Received signed agreement 8/1/22. After several attempts to contact the resident, a sampling was scheduled for 9/13-14/22.

It is noted that the total of received signed agreements tallied above did not change from last month as it was determined that the signed access agreement received for 817 Eales Avenue last month was a duplicate. The original signed agreement was received 11/30/21, however, after numerous attempts to contact the owner (phone calls and 2 letters), no return contact was made to schedule sampling. After the above noted WDNR/DHS visit, a second signed agreement was received on 7/27/22 and got tallied again into the received agreements total. The initial sampling at this residence was completed on 8/10/22 with no TCE exceedance of the Vapor Action Limit (VAL) in indoor air and no Vapor Risk Screening Level (VRSL) exceedance in the sub-slab vapor sample.

- Two new SSDSs were installed in August:
 - 1212 Lombardi Way (8/2/22)
 - 1215 The Strand (8/16/22)
- Ongoing sampling is being scheduled for properties that have already provided access previously and have still not had four rounds of sampling.
- PFET testing is continuing for previously installed systems. During these visits, the systems are being retrofitted with an alarm in some cases requiring the installation of new GFCI outlets.
- Commercial property status summary is as follows:
 - Received signed agreements: 6
 - Denials: 2
- Figure 1 illustrates the status of all properties.

- On July 19, 2021 Navistar received an e-mail from WDNR requesting to proceed with the proposed additional vapor intrusion sampling at the newly constructed apartments and townhouses located at 1420 and 1421 White Rock Avenue. It is Navistar's understanding that additional sampling will be completed by the property owner.

Please call me at 262-781-0475 with any questions.

Sincerely,
KPRG and Associates, Inc.

Richard R. Gnat, P.G.

Indicates that discussed with husband and they do not want system installed. I said we believe should do but ultimately their decision. Said to expect a documentation letter from me and that WDRN will also probably follow-up. Said she can call me any time if changes mind. 10/13/20 received text but they are deciding to have system installed. Installation scheduled for 11/10/20. When install contractor arrived at site, based on building/property layout and multiple foundations, the radon test requires at least two to three radon points and the piping will need to go along basement ceiling which only has one radon clearance. Based on this situation with property owner, the owner decided not to proceed with the installation at this time. May change their mind as potential sale of property proceeds.

Set up meeting for 6/20/19 to visit facility, determine testing approach and discuss with Healey. Met with Joseph Joseph (Production/Quality manager) and discussed the issues and project. Walked briefly inside production areas. Discussed high volume purge testing process and tentative locations. Will need to work after 4pm. Joseph Joseph signed agreement. Indicated that he is tenant and was authorized by property owner. We asked if he can also get property owner to sign as agreement must be with the owner. He will get a hold of the owner and have it signed. We are to get back to him within 2 weeks with tentative schedule. 7/9/19 received signed approval by property owner. In discussions with tenant for scope and schedule. Met with operator 8/7/19. Agreed upon where points will be installed and working on when it will work best for their schedule to do the work. Installed and sampled 5 HV points 10/21/19 - 10/23/19. Elliot Erickson called 10/25/19, PA returned call 10/28/19 with project update. On 11/20/19 KPRG submitted a Heale Manufacturing Data Transmittal to WDNR. 1/27/20 received call from property owner asking when we will abandon the sampling points. Said we are waiting for answer from WDNR if our initial testing was sufficient. Contacted Mark Drews. He indicates they are still preparing a response and waiting for Pam Mylotta review. 2/10/20 WDNR issues a review letter of the 11/20/19 data submittal. The WDNR noted 5 comments that it would like addressed. KPRG/Navistar are in process of responding to the comments. 4/28/20 responses provided to WDNR. KPRG contacts Healey to start scheduling additional sampling. 2/4/21 submit WP for high-volume purge point removal and install of discrete vapor pins. Week of 2/10/21 abandon high-volume purge points, install new vapor pins and collect round of samples. No indoor air or sub-slab vapor exceedances. Based on April 2021 sampling, WDNR made determination that SSDS required based on Small commercial standard. SSDS installed for the southern portion of the building July 21-23, 2021. PFET 5/12/22. PFET sch 9/7/22.

Notes: All values are in ug/m³.

VAL - Vapor Action Level = 2.1 ug/m³.

TCE - Trichloroethene

IA / OA - Indoor Air / Outdoor Air

Bold - Result exceeds the VAL

J - Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.

NS - Not Sampled. Other OA Sample collected nearby.

Notes: All values are in ug/m³.

VRSL - Vapor Risk Screening Level = 70 ug/m³.

Bold - Result exceeds the VRSL

A3 - The sample was analyzed by serial dilution.

IS - The internal standard response is below criteria. Results may be biased high.

J - Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.
