KPRG Project No. 11717

Re: Former Navistar/RMG Foundry

1401 Perkins Avenue, Waukesha, WI

BRRTS# 02-68-098404

Dear Mr. Drews:

Per the approved Work Plan dated May 3, 2019, the following is a monthly update of the status of the soil vapor intrusion study work associated with the above referenced site since the previous monthly status summary:

- Tables 1A through 1F summarize the status of all residential properties and Table 2 summarizes the status of all commercial properties. Attachment 1 includes complete tables of indoor air and sub-slab vapor sampling data to date. At this point, the table has been reduced to focusing only on trichloroethene (TCE) data as requested by Wisconsin Department of Natural Resources (WDNR).
- Residential property status summary is as follows:
  - o Total number of residential properties (excluding vacant lots) 99
  - Received signed agreements: 80
    - Installed SSDS: 43
    - SSDS Installations Being Scheduled 2
    - Previously Existing SSDS Systems Installed by Others 3
  - o In discussions/process of signing: 0
  - o Denials: 5
  - o No response: 14

Of the 13 properties identified in the 9/11/19 site visit list for pre-emptive installations, six sub-slab depressurization systems (SSDSs) have been installed, one existing system

(installed by Others) was inspected, repaired and restarted. Of the four properties requested by WDNR for pre-emptive installations due to sub-slab vapor accumulations identified in the 8/14/19 meeting/conference call summary letter, three installations have been completed and one is still in the process of being scheduled (901 Eales Avenue). On October 20, 2022, after several attempts, KPRG met with Mr. Novak at the residence in the evening. He agreed again to the installation and said he will work with the installation contractor to establish the schedule. It is noted that the basement of his home is fully cluttered and he may need to move some stored items to allow for contractor access. Subsequent discussions with Mr. Novak and the installation contractor resulted in Mr. Novak requesting the contractor to call back in mid-January 2023 to finalize an installation date.

- No new access agreements were received in November 2022.
- No new SSDSs were installed in November. The initial sampling for 904 Regent Street (received access agreement in August 2022) was completed on September 14, 2022 with data received September 22, 2022. The results indicated that the indoor air was below the established residential Vapor Action Level (VAL), however, there was an accumulation of TCE vapor beneath the basement floor in excess of the Vapor Risk Screening Level (VRSL). KPRG discussed the results with the property owner who has agreed to the installation of a SSDS. The installation contractor met with the tenant on November 10, 2022 and inspected the crawl space and determined the seal was sufficient and obtained overall measurements for anticipated system design. All parts have been ordered and final installation schedule being coordinated with tenant for December.
- Ongoing sampling is being scheduled for properties that have already provided access
  previously and have still not had four rounds of sampling. During performance of
  scheduling calls, on October 28, 2022 KPRG was informed that the property located at 825
  Eales Avenue was sold. A new access agreement request was sent to the new property
  owner, however, to date no response has been received.
- PFET testing is continuing for previously installed systems. During these visits, the systems are being retrofitted with an alarm in some cases requiring the installation of new GFCI outlets.
- Commercial property status summary is as follows:
  - o Received signed agreements: 6
  - o Denials: 2
- Figure 1 illustrates the status of all properties.
- On July 19, 2021 Navistar received an e-mail from WDNR requesting to proceed with the proposed additional vapor intrusion sampling at the newly constructed apartments and townhouses located at 1420 and 1421 White Rock Avenue. It is Navistar's understanding that additional sampling will be completed by the property owner.

Please call me at 262-781-0475 with any questions.

Sincerely,

KPRG and Associates, Inc.

Richard R. Gnat, P.G.

Knocked twice, once at 4:55 pm and once at 5:15 pm but no answer. 9/13/19 5:05 pm met with tenant William. Discussed issue, noted that all houses around the property had detections of TCE and systems were installed. We would like to sample as well as install a system pre- emptively in the house but need property owner access. Asked him to forward the information to the owner. He indicated that he is not on good terms with owner and that the house is supposed to go up for sale in October but that he would pass on the information with a request that he would like to have the work done. 11/25/19 visit w/ WDNR. He will be providing to us the new owner information. Information never provided. see that it is an in-home nursing care office (At Home Caring Angels). Get new owner information from County Tax Assessor map. Send letter. 3/5/20 Cathy (owner) calls about letter. Wants to verify no cost to her even for system install if needed. I said correct except for electrical draw. Will sign and send in agreement. 3/9/20 received signed agreement, called Cathy and set up site meeting for Wednesday 3/11/20. Set sampling schedule for 3/25-26, 2020. Sampling cancelled due to Governor's Safer At Home Emergency Order #12. Will rescheduled for end of April or earlier if Order is rescinded. 5/28/20 contact owner. Set up sampling. 6/22/20 received sampling results indicating indoor air exceedances and one sub-slab exceedance. Contact owner that afternoon to discuss and set up meeting for 6/23/20 to discuss further. offer carbon units to be set up that afternoon but owner said to wait until morning meeting. 6/24/20 meet with owner and also set up three carbon units, two within administrative area and one in front garage work area. Set up site meeting for 6/25/20 with SSDS install contractor to get an estimate for installation. 7/13/20. Completed sub-slab pressure field extension testing to assist in design of system. SSDS scheduled for installation 8/4/20. SSDS installed. 8/19/20 collected post-SSDS install indoor air samples. Results below VAL. June visit indicated that someone turned off the fans (believed to be neighbor to south). Fans phased back up over two visists. PFET follow-up completed 7/18/21, 11/3/21. PFET 5/12/22. Fans being

Since this is an auto repair shop he is concerned on what we might find and potentially get pulled into the process. He indicated that he wants to talk to his attorney and would get back to us. Will probably want any sampling limited to CVOCs. After not hearing back, two additional letters sent and then a WDNR letter sent 3/27/19. 3/29/19 received call with request for another meeting. Met with owner on 4/4/19 and basically had the same discussion as in October. He has not yet talked to an attorney. Said he will not sign until he does that. Has not committed to a timeframe to respond. 9/11/19 site visit with WDNR, spoke with Thomas, left packet, he will likely not sign without guarantee of property value among other reasons.

Set up meeting for 6/20/19 to visit facility, determine testing approach and discuss with Healey. Met with Joseph Joseph (Production/Quality manager) and discussed the issues and project. Walked briefly inside production areas. Discussed high volume purge testing process and tentative locations. Will need to work after 4pm. Joseph Joseph signed agreement. Indicated that he is tenant and was authorized by property owner. We asked if he can also get property owner to sign as agreement must be with the owner. He will get a hold of the owner and have it signed. We are to get back to him within 2 weeks with tentative schedule. 7/9/19 received signed approval by property owner. In discussions with tenant for scope and schedule. Met with operator 8/7/19. Agreed upon where points will be installed and working on when it will work best for their schedule to do the work. Installed and sampled 5 HV points 10/21/19 - 10/23/19. Elliot Erickson called 10/25/19, PA returned call 10/28/19 with project update. On 11/20/19 KPRG submitted a Heale Manufacturing Data Transmittal to WDNR. 1/27/20 received call from property owner asking when we will abandon the sampling points. Said we are waiting for answer from WDNR if our initial testing was sufficient. Contacted Mark Drews. He indicates they are still preparing a response and waiting for Pam Mylotta review. 2/10/20 WDNR issues a review letter of the 11/20/19 data submittal. The WDNR noted 5 comments that it would like addressed. KPRG/Navistar are in process of responding to the comments. 4/28/20 responses provided to WDNR. KPRG contacts Healey to start scheduling additional sampling. 2/4/21 submit WP for high-volume purge point removal and install of discrete vapor pins. Week of 2/10/21 abandon high-volume purge points, install new vapor pins and collect round of samples. No indoor air or sub-slab vapor exceedances. Notes: All values are in ug/m<sup>3</sup>.

VRSL - Vapor Risk Screening Level = 70 ug/m³.

Bold - Result exceeds the VRSL

A3 - The sample was analyzed by serial dilution.

IS - The internal standard response is below criteria. Results may be biased high.

J - Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.
