KPRG Project No. 11717

Re: Former Navistar/RMG Foundry
1401 Perkins Avenue, Waukesha, WI
BRRTS# 02-68-098404

Dear Mr. Drews:

Per the approved Work Plan dated May 3, 2019, the following is a monthly update of the status of the soil vapor intrusion study work associated with the above referenced site since the previous monthly status summary:

- Tables 1A through 1F summarize the status of all residential properties and Table 2 summarizes the status of all commercial properties. Attachment 1 includes complete tables of indoor air and sub-slab vapor sampling data to date. At this point, the table has been reduced to focusing only on trichloroethene (TCE) data as requested by Wisconsin Department of Natural Resources (WDNR).
- Residential property status summary is as follows:
 - Total number of residential properties (excluding vacant lots) - 99
 - Received signed agreements: 80
 - Installed SSDS: 43
 - SSDS Installations Being Scheduled - 2
 - Previously Existing SSDS Systems Installed by Others – 3
 - In discussions/process of signing: 0
 - Denials: 5
 - No response: 14

Of the 13 properties identified in the 9/11/19 site visit list for pre-emptive installations, six sub-slab depressurization systems (SSDSs) have been installed, one existing system (installed by Others) was inspected, repaired and restarted. Of the four properties requested

by WDNR for pre-emptive installations due to sub-slab vapor accumulations identified in the 8/14/19 meeting/conference call summary letter, three installations have been completed and one is still in the process of being scheduled (901 Eales Avenue). As noted in previous progress reports, the property owner at 901 Eales Ave. has not been responsive regarding setting up an installation date. KPRG and the installation contractor will continue to follow-up with the property owner.

- No new property access agreements were received in September 2023.
- The residence at 909 Regent Street, which was first accessed last month, had an existing radon venting system that was installed as part of the recent property transfer of that residence. The initial indoor air sampling within the basement completed by KPRG detected TCE above the established the Vapor Action Level (VAL; see August 2023 report). A subsequent pressure field extension test (PFET) completed by Lifetime Radon Solutions (KPRG contractor) determined that the existing system is not affecting the entire footprint of the basement. An additional extraction point was determined to be necessary, as well as a larger blower unit. The proposed modification of the existing system is currently scheduled for October 3, 2023. Once the system modifications are completed, within two to three weeks KPRG will schedule another indoor air sampling event to verify system effectiveness relative to previously documented TCE impacts. It is noted that a carbon filter unit was placed into the basement the same day of receipt of the initial indoor air sampling data.
- The installation for 904 Regent Street was completed on February 7, 2023. The resident has been contacted numerous times via phone, text messages and mail correspondence asking them to contact us for scheduling of a follow-up indoor air sampling as well as a follow-up system inspection and PFET. A site visit was also performed in August 2023 but nobody was home at the time. On September 26, 2023, KPRG again stopped by the residence and this time the resident was home. A follow-up indoor air sampling date was established and the PFET contractor is also set to complete another system check immediately after completion of sampling.
- Ongoing sampling is being scheduled for properties that have provided access previously and have still not had four rounds of sampling. The resident at 1147 Lombardi Way, which signed the access agreement in October 2022, has cancelled a previously scheduled sampling event in February 2023 and since that time has either not been available for sampling or has not responded to letters, telephone calls and/or texts. On September 26, 2023, KPRG again stopped at the residence. The resident was home and agreed to a sampling schedule in mid-October. This will be the initial sampling event for that residence.
- PFET testing is continuing for previously installed systems.
- Commercial property status summary is as follows:
 - Received signed agreements: 6

- Denials: 2
 - Figure 1 illustrates the status of all properties.
 - On July 19, 2021 Navistar received an e-mail from WDNR requesting to proceed with the proposed additional vapor intrusion sampling at the newly constructed apartments and townhouses located at 1420 and 1421 White Rock Avenue. It is Navistar's understanding that additional sampling will be completed by the property owner. A liability clarification request will be submitted by Navistar to WDNR regarding this issue.

Please call me at 262-781-0475 with any questions.

Sincerely,
KPRG and Associates, Inc.

Discussed issue and provide packet. Son indicated he will contact and provide to owner. 9/17/19 Jill Sturman (renter) called. Explained issue and the request for sampling and pre-emptive install. Said she would be agreeable but need to work with her schedule. She is renting house for her mother-in-law who has alzheimers. The house rental is managed through Real Property management (Stacy Becker). 9/17/19 talked with Stacy Becker and she will get the owner to sign agreement and e-mail back to me. 9/18/19 received access agreement signed by owner. 9/19/19 During sampling determined that there is a radon system in place just not working. 9/20/19 Have SSDS install contractor inspect system. Replace fan, check piping and electrical. System running with good PFET results. 11/26/19 left voice mail for resampling. After numerous attempts by install contractor to schedule last follow-up PFET it was determined that the property was sold. Got new ownership information from Waukesha Assessor. Sent letters 4/28/22, 6/17/22 12/28/22. On 1/24/23 KPRG met with the new property owner. He indicated he received the previous letters. KPRG explained the issue and went through the information packet that was previously sent and noted that only one more PFET test is needed to be completed for his system. We asked if we can show him the system in the basement and further explain the PFET testing work but he did not allow us entry. He said he would consider the request and get back to us. Another complete information packet was left with him. have not heard back to date.

Called Chris Obst 5/14/19. House is vacant. Set up sampling for 5/15/19. Scheduling install. House is currently vacant and undergoing complete internal remodel. Call owner 6/3/19 to discuss results and system installation recommendation. Set installation schedule. System installed but can't get full capture due to poor condition of basement floor (heavily eroded/cracked and only about 0.5-inch thick). 6/13/19 called Chris to discuss floor options. He said to hold off on any decisions since he is in process of selling and will want us to coordinate with the new owner because he does not know yet what the final remodel plans or whether the purchaser will do a tear down. Am to call him in 3 weeks if I do not hear anything. 7/22/19 talked with Chris Obst. Has sold the property to Robert Raenek. 7/18/19 talked with Robert Raenek and sent new access agreement letter. 8/6/19 talked with Robert R. and his question was whether we are responsible for sealing or replacing the basement floor to allow for a vacuum to be pulled by the SSDS. I indicated that my understanding was that as part of the purchase he was going to be responsible for the basement floor sealing/replacement as well as bringing the electrical up to code. He indicated that he will review the information again and get back to me but that he felt that our client may be responsible for upgrading the floor to meet the performance requirement of the SSDS.

He indicates they are still preparing a response and waiting for Pam Mylotta review. 2/10/20 WDNR issues a review letter of the 11/20/19 data submittal. The WDNR noted 5 comments that it would like addressed. KPRG/Navistar are in process of responding to the comments. 4/28/20 responses provided to WDNR. KPRG contacts Healey to start scheduling additional sampling. 2/4/21 submit WP for high-volume purge point removal and install of discrete vapor pins. Week of 2/10/21 abandon high-volume purge points, install new vapor pins and collect round of samples. No indoor air or sub-slab vapor exceedances. Based on April 2021 sampling, WDNR made determination that SSDS required based on Small commercial standard. SSDS installed for the southern portion of the building July 21-23, 2021. PFET 5/12/22. PFET completed 9/7/22. PFET completed 1/10/23.
1230 The Strand	Higbee Development, LLC	Yes	No	5/6/2019 6/8/2019 DHS visits 7/12/22, 7/24/23	Denied	NA	NA	NA	Received denial 6/13/19 after second letter. Owner made note that there is no basement in this structure. A KPRG drive-by indicates this is a small auto repair shop/garage. 6/18/18 called and talked with Gary Higbee and indicated that this study is not just meant for basements and that vapor can enter through floor slab of grade type construction. He indicated that at this time he will pass on this. I indicated that he will get a letter from WDNR recommending that he reconsider. He said he may do so at that time.

Notes: All values are in ug/m³.

VAL - Vapor Action Level = 2.1 ug/m³.

TCE - Trichloroethene

IA / OA - Indoor Air / Outdoor Air

Bold - Result exceeds the VAL

J - Result is less than the Reporting Limit but greater than or equal to the Method

Notes: All values are in ug/m³.

VRSL - Vapor Risk Screening Level = 70 ug/m³.

Bold - Result exceeds the VRSL

A3 - The sample was analyzed by serial dilution.

IS - The internal standard response is below criteria. Results may be biased high.

J - Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.
