KPRG Project No. 11717

Re: Former Navistar/RMG Foundry  
1401 Perkins Avenue, Waukesha, WI  
BRRTS# 02-68-098404

Dear Mr. Drews:

Per the approved Work Plan dated May 3, 2019, the following is a monthly update of the status of the soil vapor intrusion study work associated with the above referenced site since the previous monthly status summary for April 2024:

- Tables 1A through 1F summarize the status of all residential properties and Table 2 summarizes the status of all commercial properties. Attachment 1 includes complete tables of indoor air and sub-slab vapor sampling data to date. At this point, the table has been reduced to focusing only on trichloroethene (TCE) data as requested by Wisconsin Department of Natural Resources (WDNR).
- Residential property status summary is as follows:
  - Total number of residential properties (excluding vacant lots): 99
  - Received signed agreements: 83
    - Installed SSDS: 44
    - SSDS Installations Being Scheduled: 2
    - Previously Existing SSDS Systems Installed by Others: 3
  - In discussions/process of signing: 0
  - Denials: 5
  - No response: 11

Of the 13 properties identified in the 9/11/19 site visit list for pre-emptive installations, six sub-slab depressurization systems (SSDSs) have been installed, one existing system (installed by Others) was inspected, repaired and restarted. Of the four properties requested by WDNR for pre-emptive installations due to sub-slab vapor accumulations identified in the 8/14/19

meeting/conference call summary letter, three installations have been completed and one is still in the process of being scheduled (901 Eales Avenue). As noted in previous progress reports, the property owner at 901 Eales Ave. has not been responsive regarding setting up an installation date. The installation contractor will continue to follow-up with the property owner. KPRG has also left messages and sent another letter on March 19, 2024, requesting a call back to set schedule for installation. Considering the owners lack of responsiveness, the letter also included an option to choose not having a system installed with a signature line along with a self-addressed, stamped return envelope. On April 23, 2024 in late afternoon KPRG visited the residence. Although the owner was home (saw him enter the house), he did not answer the door. Left another request letter and information package on the door. No response to date.

- No new access agreements were received in April.
- No new SSDS installations were completed in April.
- Follow-up indoor air samplings were completed for 825 Eales (4<sup>th</sup> sampling round) and 1204 Phoenix Drive (3<sup>rd</sup> sampling round). There were no detections of TCE above applicable standards at either location.
- Ongoing sampling is being scheduled for properties that have provided access previously and have still not had four rounds of sampling.
- PFET testing is continuing for previously installed systems not yet having four rounds of PFET.
- Commercial property status summary is as follows:
  - Received signed agreements: 6
  - Denials: 2
- Figure 1 illustrates the status of all properties.
- On July 19, 2021 Navistar received an e-mail from WDNR requesting to proceed with the proposed additional vapor intrusion sampling at the newly constructed apartments and townhouses located at 1420 and 1421 White Rock Avenue. It was Navistar's understanding that additional sampling would be completed by the property owner. A liability clarification request was submitted by Navistar to WDNR regarding this issue on October 3, 2023. On April 19, 2024 WDNR issued its liability clarification which divided the responsibilities between Bear Development and Navistar. Bear Development is responsible for the cost of system installation, air/vapor testing, system start-up and development of the design documentation commissioning report. Once the commissioning report is issued, WDNR has assigned the system operation and maintenance inspections for both addresses until the time that case closure is issued. This includes the development of the O&M Plan for the systems. This work is being evaluated by Navistar at this time, however, no O&M Plan development and system maintenance inspections can be planned or completed until the design documentation and commissioning report is issued by Bear Development.

Please call me at 262-781-0475 with any questions.

Sincerely,  
KPRG and Associates, Inc.

In discussions with tenant for scope and schedule. Met with operator 8/7/19. Agreed upon where points will be installed and working on when it will work best for their schedule to do the work. Installed and sampled 5 HV points 10/21/19 - 10/23/19. Elliot Erickson called 10/25/19, PA returned call 10/28/19 with project update. On 11/20/19 KPRG submitted a Heale Manufacturing Data Transmittal to WDNR. 1/27/20 received call from property owner asking when we will abandon the sampling points. Said we are waiting for answer from WDNR if our initial testing was sufficient. Contacted Mark Drews. He indicates they are still preparing a response and waiting for Pam Mylotta review. 2/10/20 WDNR issues a review letter of the 11/20/19 data submittal. The WDNR noted 5 comments that it would like addressed. KPRG/Navistar are in process of responding to the comments. 4/28/20 responses provided to WDNR. KPRG contacts Healey to start scheduling additional sampling. 2/4/21 submit WP for high-volume purge point removal and install of discrete vapor pins. Week of 2/10/21 abandon high-volume purge points, install new vapor pins and collect round of samples. No indoor air or sub-slab vapor exceedances. Based on April 2021 sampling, WDNR made determination that SSDS required based on Small commercial standard. SSDS installed for the southern portion of the building July 21-23, 2021. PFET 5/12/22. PFET completed 9/7/22. PFET completed 1/10/23.

Owner made note that there is no basement in this structure. A KPRG drive-by indicates this is a small auto repair shop/garage. 6/18/18 called and talked with Gary Higbee and indicated that this study is not just meant for basements and that vapor can enter through floor slab of grade type construction. He indicated that at this time he will pass on this. I indicated that he will get a letter from WDNR recommending that he reconsider. He said he may do so at that time.

Notes: All values are in ug/m<sup>3</sup>.

VRSL - Vapor Risk Screening Level = 70 ug/m<sup>3</sup>.

**Bold** - Result exceeds the VRSL

A3 - The sample was analyzed by serial dilution.

IS - The internal standard response is below criteria. Results may be biased high.

J - Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.
