**Cc:** Scott D Wahl  
**Subject:** Informational Sign Posting - Tyco Fire Technology Center Project

Roxanne/Dave/Disa:

During discussions between Tyco, WDNR, and DHS regarding the potential need for informational signs along the ditches and select surface waters within the study area, it had been concluded that human health risk in these water bodies was relatively low, but that signage would be considered if there was interest raised by persons or groups. Due to recent public comments and request for information, Tyco is electing to post signs along the ditches and select surface waters within the project area. We respectfully request WDNR support on developing the content and locations for the signs, and distribution of the information to the general public in the area.

Upon agreement on content and information distribution approaches, Tyco will work expeditiously to prepare and post the signs as well as provide information and documentation to appropriate individuals and entities.

Please let me know when you are available for discussion and I will set up a call to discuss. Thank you for your assistance in advance. Please do not hesitate to contact me with questions or comments.
