Subject: Tyco Annual Report - Flooding
Date: Thursday, January 16, 2020 1:40:02 PM

Mr. Danko,

EPA and Wisconsin DNR have reviewed the Quarterly Progress Report (July through September 2019) and have some concerns regarding the flooding at the JCI/Tyco Stanton St. site. The regulatory agencies request that all observations and impacts of increasing groundwater elevations and flooding on site contamination and remedy components be documented in the 2019 annual report through photographic, narrative and technical means. The documentation should include a discussion of the occurrence and risk of surface-groundwater mixing and releases, erosion, maintenance issues, pending and completed repairs, and any other observed or considered potential threats to the integrity and resiliency of the corrective measures taken.

Please let me know if you have any questions.

Thank you,

Jennifer Dodds
