RE: Superior Manufactured Gas Plant WDNR BRRTD #02-16-275446

Dear Ms. Lancour:

Enclosed with this letter is the work plan for Phase II, Part III, of the site investigation of the former manufactured gas plant located near the intersection of Winter Street and Water Street in Superior, WI.

The purpose of this part of the investigation is to determine the extent of the impacts of the previously discovered PAH and VOC to the soil and groundwater. This part of the investigation would focus on the north and east sides of the site. The work plan consists of additional geoprobe borings and additional monitoring wells.

SWL&P will contact off-site property owners after the first of the year to obtain access agreements. SWL&P's environmental consultant, ENSR International, will conduct the on-site investigation and prepare a written report with the results of the investigation.

If you have any questions or would like any additional information, please contact me at (715) 395-6288.

Thank you.

Sincerely,

William S. Bombich
General Manager
