Subject: Conditional Approval of Site Investigation Workplan
RockGen Energy, 2346 Clear View Road, Cambridge, WI
DNR BRRTS Activity #02-13-587341

Dear Mr. Oehring:

On April 2, 2021, the Wisconsin Department of Natural Resources (WDNR) received "Site Investigation Work Plan", dated April 2021, prepared by TRC Environmental Corporation (TRC). The request was accompanied by the appropriate review fee, required under ch. NR 749, Wisconsin Administrative Code.

WDNR conditionally approves of the workplan with the following modifications:

Groundwater Investigation:

- Determine if the residential property on Carpenter Swain Road to the southeast of the RockGen facility uses a private drinking water well. If so, send a request to the property owner for you to sample their private drinking water well for per- and polyfluoroalkyl substances (PFAS).
- At least one piezometer should be installed, paired with a monitoring well, to determine vertical hydraulic gradient and vertical extent of PFAS in groundwater.

Storm Water Investigation:

- A grab sample of flow from the storm sewer outlet should be collected under first flush conditions (within the first 30 minutes of observed flow), followed by a subsequent grab sample later in, or following, the precipitation event.

WDNR appreciates your efforts to investigate and remediate this site. If you have any questions, please contact me at (608) 206-5809 or luke.lampo@wisconsin.gov.

Sincerely,

Luke Lampo
Hydrogeologist
