Subject: Approval of Interim Action Plan
RockGen Energy, 2346 Clear View Road, Cambridge, WI
DNR BRRTS Activity #02-13-587341

Dear Mr. Oehring:

On July 23, 2021, the Wisconsin Department of Natural Resources (WDNR) received "Interim Action Workplan" (the Report), dated July 2021, prepared by TRC Environmental Corporation (TRC), in which RockGen Energy (RockGen) requests use of interim actions to accelerate its remediation activities. The request was accompanied by the appropriate review fee, required under ch. NR 749, Wisconsin Administrative Code.

WDNR approves of the proposed interim actions described in the Report. WDNR concurs that the implementation of the proposed interim actions is expected to control the historical PFAS sources from further infiltrating to groundwater, migrating through stormwater, and releasing from the septic system. WDNR additionally concurs that, with the proposed interim actions, RockGen may allow natural attenuation of the impacted forested stormwater drainage channel area on the northwest portion of the property as well as the storm sewer outlet area.

As additional data are acquired during the supplemental site investigation, additional interim actions may be necessary. In particular, RockGen may propose a groundwater extraction and treatment system (if additional data indicate this will be necessary) either as an additional interim action or combine it with this interim action in the Remedial Action Options Report.

WDNR appreciates your efforts to investigate and remediate this site. If you have any questions, please contact me at (608) 206-5809 or luke.lampo@wisconsin.gov.

Sincerely,

Luke Lampo
