Subject: RE: Public Notifications Requirement for GETS - Documentation of activities

Denice - Thank you for this summary of the steps that JCI/Tyco completed to keep the public notified during construction of the GETS. We concur that you have met the Wis. Admin. Code ch. NR 714 public notification requirements outlined in the [DNR's May 18, 2021 Conditional Approval letter](#).

Alyssa-

Per our discussion a couple weeks ago, we are reviewing all the pre-start up actions needed prior to the GETS system coming online next month. Tyco has reviewed the NR 714 Public Notification requirements, and believe we have satisfied these requirements, which include explanations of objectives and expected outcomes of the interim action, operations and timeframe of the interim action, and groundwater and surface water monitoring program/reporting expectations through the following activities:

- June 29, 2021 DNR listening session: Community Update by Katie McGinty (Tyco/JCI), Scott Potter (Arcadis), Kirk Craig (Geosyntec)
- Fact Sheets: Updated the Fact Sheet to include GETS Design Objective and Expectations, which is posted on the Tyco Marinette Website: [GETS-Construction-Flyer-7-26-21.pdf \(tycomarinette.com\)](#)
- GETS Open House Events – offered throughout the GETS construction process (began on September 2021 and are still ongoing). These are posted here: [All Latest Updates – Fire Technology Center Groundwater Testing – Marinette, Wisconsin \(tycomarinette.com\)](#)

Please let me know if you would like to discuss any of the above in greater detail.

Sincerely,

Denice Nelson
