Follow Up Flag: Follow up
Flag Status: Flagged

Hi Robert,

Ideally, the pilot test results would have been presented prior to/alongside the SVE commissioning plan, since the pilot test results may indicate that system/commissioning plan modifications are necessary. As K. Singh indicates in the April 29, 2021, *Proposed Modification of Vapor Mitigation / Extraction System* report and as requested in the June 8, 2021, DNR letter, the pilot test results should be submitted to the DNR along with recommendations for system/commissioning plan modifications, as needed. Should you and the RP want a formal DNR review and response to this report, you must present an applicable technical assistance fee.

Also, can you confirm whether the HVAC system is presently fully operational throughout the site buildings?

Thanks, Jane

Jane,

We're in the process of performing a pilot test this week. Based on the results of the pilot test, I'll be able to provide a schedule for further work such as installation of the blowers and the schedule for commissioning.

Subject: CWC - East Block (02-41-263675) - Commissioning Plan

Hi Robert – Yesterday the above-referenced report was submitted to the DNR without a fee for the CWC – East Block site. The report generally indicates that both the first round of commissioning and residential building occupancy will occur in January/February 2023. Do you have any specific dates for when each of these separate actions will occur?

Thanks, Jane
