Hi Shane,

Thank for your presenting the *Weekly Progress Report for Week Ending 4/15/2023* (Report) for the Community Within the Corridor – East Block on 04/17/23. The Report indicates that an emergency corrective action plan (Plan) will be submitted to the DNR. The Plan was submitted to the DNR last evening (04/19/23) with a technical assistance fee for DNR review and response. Present the following supplemental documentation to accompany the Plan:

1. Comprehensive vapor data tables (indoor air and sub slab) that show all TCE and PCE data collected to date. Provide the raw excel sheets with this data in addition to the PDF versions.
2. Provide compressive figures that clearly label all vapor sample locations. The figure(s) must label **all** sample locations listed in the comprehensive data tables.

Please understand that the above-requested documentation is important for the DNR to review and respond to the Plan. Until this documentation is submitted, the DNR is unable to perform a comprehensive technical review of the Plan and this may cause unnecessary delays in providing you with a technical assistance response. Therefore, **provide the above-outlined documentation by tomorrow (04/21/23) at 12PM.**

Furthermore, attached is the DNR's 04/06/23 email, which provides feedback concerning the DNR's 03/30/23 and 03/31/23 site visits and additional feedback/information requests. Continue to consider and incorporate the DNR feedback presented in the 04/06/23 email into your weekly summary reports, as applicable. More specifically, as outlined in the DNR's 04/13/23 email (attached), the notification documentation was due in the 04/17/23 weekly progress report. This notification documentation has not been submitted. Therefore, **submit the notification documentation in the weekly summary report that is due next Monday (04/24/23) at 4 PM.**

Thank you, Jane

We are committed to service excellence.
