Subject: Remaining Actions Needed for Case Closure under Wis. Admin. Code chs. NR 700-754  
Nor Lake Soil & GW Remediation  
BRRTS #02-56-000089

Dear Mr. Mullen:

On April 6, 2023, the Department of Natural Resources (DNR) reviewed your request for closure of the case described above. The DNR reviews environmental remediation cases for compliance with applicable local, state and federal laws. The following actions are required prior to the DNR granting you case closure in compliance with Wis. Stat. ch. 292 and Wis. Adm. Code chs. NR 700-754. Upon completion of these actions, closure approval will be provided. Pursuant to Wis. Adm. Code § NR 726.09 (2) (g), you are required to provide this information to the DNR within 120 days of the date of this letter.

### **Remaining Actions Needed**

#### Monitoring Well and Remedial System Piping Filling and Sealing

The Norlake installed monitoring wells both on and off-site, DNR installed monitoring wells: MW-52, MW-57D, MW-57S, and all remaining remediation systems on site must be properly filled and sealed in accordance with Wis. Adm. Code ch. NR 141. Documentation of filling and sealing for all wells and boreholes must be submitted to Candace Sykora on DNR Form 3300-005. To download the form, go online at [dnr.wi.gov](http://dnr.wi.gov) [and search "form 3300-005"](#).

DNR is currently working with St. Croix County to transfer ownership of the 7 remaining DNR installed monitoring wells to the county. After ownership of these wells is officially transferred, closure approval will be provided. If the county ultimately does not take ownership of these wells, DNR will further discuss responsibility for abandonment with Norlake before closure approval can be provided.

### **Documentation**

When the required actions are completed, submit the appropriate documentation within 120 days of the date of this letter, to verify completion.

See *Guidance for Electronic Submittals for the Remediation and Redevelopment Program, RR- 690* for additional information. To view the document online, go to [dnr.wi.gov](http://dnr.wi.gov) and search "RR 690".

### **Listing on Database**

This site will be listed on the DNR's Bureau for Remediation and Redevelopment Tracking System on the Web (BOTW) and RR Sites Map, to provide public notice of remaining contamination and continuing obligations. The

continuing obligations will be specified in the final case closure approval letter sent to you. Information that was submitted with your closure request application will be included on BOTW, located online at [dnr.wi.gov](http://dnr.wi.gov) and search "BOTW".

**In Conclusion**

We appreciate your efforts to restore the environment at this site. This remedial action project is nearing completion. I look forward to working with you to complete all remaining actions that are necessary to achieve case closure.

If you have any questions regarding this letter, please contact the project manager, Candace Sykora, at (715) 928-0452 or [candace.sykora@wisconsin.gov](mailto:candace.sykora@wisconsin.gov).

Sincerely,

David Rozeboom  
Field Integration Leader
