SUBJECT: Approval Letter Authorizing Groundwater Treatment System Testing  
WI-0001040-07-0

Dear Permittee:

The Department of Natural Resources (hereafter Department) is granting approval for Tyco Fire Protection Products to proceed with testing to see if its groundwater collection and treatment system can successfully treat arsenic contaminated groundwater from the pump down program at the facility site. The procedure for doing this testing is explained in your letter dated June 20, 2017.

In accordance with Section 5.2.6 "Planned Changes" in the Standard Requirements of your WPDES Permit, you have properly notified the Department of new or increased discharges of pollutants and you have a conservative plan for gradually increasing the groundwater volume going to the treatment system and a plan in place for sampling pollutant concentrations which should minimize the chance of violating the effluent limits in your WPDES Permit.

If you have any questions regarding this decision, please contact me at (920) 424-7895 or by email:
