Joe,

Thank you for providing a description of, and schedule for, the Dye Test Alternative Work Plan. Previously, the dye test was scheduled to be implemented by May 1, 2018. EPA and WDNR agreed in our December 20, 2017 meeting that the results of the Pilot Dye Test show that the full scale Dye Test will not meet the objective of detecting a leak in the barrier wall. EPA agrees that implementing an alternative approach is necessary, and agrees to the schedule proposed below. Please submit the Dye Test Alternative Work Plan by March 16, 2018.

I am available for a conference call or webinar the week of February 5. Please propose a date and time to discuss Tyco's selected alternative.

Thank you,
Conor

Subject: Dye Test Alternative Schedule Correspondence

Conor,

Based on feedback received during our December 20, 2017 meeting, Tyco is sending this schedule and will continue the assessment of potential alternatives to the full-scale dye test prescribed in the 2014 Agreement on Resolution. Tyco expects to select an alternative or combinations thereof by the end of January and subsequently submit a Work Plan for the selected alternative by March 16, 2018. If desired by the agencies, Tyco would be amenable to a call in early February with EPA and WDNR to discuss the selected alternative prior to submittal of the Work Plan. The alternatives analysis and selection results will be included in the Work Plan. A schedule for implementation of the selected

alternative also will be included in the Work Plan. The proposed implementation dates for the selected alternative, expected to be summer or early fall 2018, would be performed to enable inclusion of test results in the Five Year Review Report due December 31, 2018.

Sincerely,
Joe

NOTE: My e-mail has changed to joseph.janeczek@jci.com - please makethis change in your directory and contacts - thank you.
