Subject: Question About Wauleco File

Hi Matt,

I was looking over some of the files from my trip to your office. One document dated June 13, 1986 states that there were one or two private wells in the neighborhood that may have been used for watering gardens and such. It references 136 Edwards Street as having one of those potential wells. It mentions that the owner consented to having the well tested, but I do not have any of the files with those results (there were so many documents, I only read a small portion of them when I visited).

If you get a chance, could you please let me know if they did end up testing that well at 136 Edwards Street at any point and what the results were (or if there are a few files on that you could share, it would be much appreciated)?

Thanks for your help,

Tom
