Dear Roxanne:

January 23, 1996 Spill at WPS Pulliam Plant, 1530 N. Bylsby Ave., Green Bay, WI

The spill of oil from a crane parked at the Pulliam Plant was cleaned up on January 24, 1996 by Rocket Sewer, a spill response contractor hired by Essex Crane Rental. Because the oil leaked onto snow, a crew from Rocket shoveled the oil-contaminated snow into 4-55 gallon drums. The drums were then transported back to their Appleton facility, allowed to thaw indoors, and the contaminated water was treated in an oil-water separator. The water was added to their wastewater storage tank, the contents of which were subsequently tested and transported to the local treatment plant. The recovered oil was burned in the facility's used oil burner.

Because this immediate action was initiated by AZCO, the general contractor working at Pulliam, and the crane company, a report was not written by the spill response contractor. However, Pulliam personnel observed the removal action and were satisfied that the contamination was removed.

I apologize for the delay in providing this information. I was not aware that the firm hired by AZCO and Essex had not submitted a report to the plant or the Department regarding the cleanup action. If you have any questions, please call me at 433-1140.

Sincerely,

Connie Lawniczak
