Subject: Hydraulic Oil Release, April 14, 2010

Dear Mr. Moeller,

On April 14, 2010 at approximately 10:10 am, Oshkosh Corporation reported a release of hydraulic oil to the DNR 24-hour Spill Hotline. As reported, approximately 20 gallons of hydraulic oil was released on a hard packed clay and gravel portion of the Oshkosh Defense Plant yard located at 2737 Harrison Street, Oshkosh WI, 54901. The spill was completely contained within the boundaries of the plant site, in an area approximately 15 feet wide by 30 feet long.

The plant's spill response procedures were initiated without delay upon discovery of the release. Free liquid was recovered using absorbent materials immediately after the spill was contained. The impacted clay/gravel was excavated to a depth of approximately 3 inches by Chief Industrial Services. The area was excavated until no visual or olfactory evidence of oil remained. Approximately 4 yards of soil, totaling 6.9 tons in weight was taken to the Waste Management Valley Trails Landfill Facility. Copies of the shipping manifest from Chief Industrial Services and the certificate of disposal from the Valley Trails Landfill Facility are attached.

Subsequent investigation of the incident by plant personnel determined that the release was caused when an individual failed to follow established procedures by removing a part from a vehicle without first bringing the vehicle to the teardown line where fluids can be safely recovered. To prevent future reoccurrence, plant management has re-communicated to all appropriate employees that removal of parts and components from vehicles stored in the plant yard is not allowed.

Oshkosh Corporation is respectfully requesting full closure of this spill incident. If you have any questions or concerns, please contact me at (920) 233-9321.

Sincerely,

Tom Mosher
Environmental Manager
