SUBJECT: 7/2/98 Petroleum Based Coolant Spill at Mercury Marine; W6250 Pioneer Road; Fond du Lac

Dear Mr. Haase:

The Department has received the spill response and documentation summary. The Department of Natural Resources has reviewed the response summary and concur that the environment has been restored to the extent practicable as provided in ch. NR 708.09, Wis. Adm. Code. Therefore, the Department is requiring no further action at this time.

We appreciate your efforts to protect and restore the environment at this site. If you have any questions regarding this No Further Action determination, please contact me at the number listed below.

Sincerely,

Roxanne Nelezen Chronert
Spills Coordinator - Hydrogeologist

RECEIVED
JUL - 9 1998
LMD SOLID WASTE

Dear Ms. Chronert:

This letter is in regard to a spill which occurred at Mercury Marine's Plant #15 in Fond du Lac, WI, at approximately 7:00 a.m. on Thursday, July 2, 1998. Ray Moreno, of our Environmental Compliance Department, originally reported the spill on July 2, 1998, by telephone to the Wisconsin Division of Emergency Management's spill hotline.

The material which was spilled was a non-hazardous water-soluble petroleum-based waste coolant. Approximately 5-to-10 gallons of this liquid flowed across an asphalt drive in front of the Plant #15 metal shavings recycling building and entered a storm sewer catch basin. The coolant was released when a coolant recovery drain was plugged allowing coolant to accumulate on the building floor and flow out the front door onto the drive.

Mercury Marine's HazMat Team responded to the spill by vacuuming the spilled coolant out of the point-of-entry catch basin and the next downstream catch basin. Then, the point-of-entry catch basin was flushed with water while vacuuming the nearest downstream catch basin to enhance recovery. The adjacent parking lot was also cleaned with a floor/pavement sweeper. Several catch basins further downstream were visually inspected, with no evidence that the spill had migrated downstream to the receiving city storm sewer. The spill and all cleanup activities occurred during dry weather conditions. The recovered coolant was disposed of in Mercury Marine's coolant recovery system.

Mercury Marine believes that the spill was adequately addressed and hereby requests a Letter of No Further Action under the provisions of NR 708.09.

If you need any additional information, please contact me at (920) 929-5963.

Sincerely,

Alan L. Haase
