Action Taken By DNR

☐ No Action Taken ☒ Investigation ☐ Supervise/Conduct Cleanup
☐ Spiller Required To Take Action; Type _____
☐ Contractor Hired By DNR; Name _____
☐ Amount Recovered _____
☐ 29.29 Enforcement

Other Agencies on Scene

Local Alto Fire Dept., Hydrite Chemical Co.
State _____
Federal _____

Action Taken By Spiller

☐ No Action Taken ☐ No Notification ☐ Investigate
☒ Containment; Type Containment Room
☒ Cleanup; Method Pumped into bulk trucks and treated in sanitary system
☐ Amount Recovered _____
☐ Monitor _____
☐ Contractor Hired; Name _____
☒ Other Action Neutralized prior to treatment

Spill Location

☐ Industrial Facility/Paper Mill/Chem. Co.
☐ Gas/Service Station/Garage, Auto Dealer, Repair Shop
☒ Ag Coop/Facility/Cheese Factory/Creamery
☐ Other Small Business (bank, grocery, insurance co., etc.)
☐ Public Property (city, county, state, church, school, etc.)
☐ Utility Co., Power Generating/Transfer Facility
☐ Private Property (home/farm)
☐ Pipeline, Terminal, Tank Farm, Oil Jobber/Wholesaler
☐ Transportation Accident, Fuel Supply Tank Spill
☐ Transportation Accident, Load Spill
☐ Construction, Excavation, Wrecking, Quarry, Mine
☐ Other _____

Spilled Substance Destination

☒ Air
☐ Soil
☐ Groundwater
☐ Surface Water
☐ Storm Sewer
☐ Sanitary Sewer
☒ Contained/Recovered
☐ Other _____

November 19, 1992

At approximately 6:00 a.m. a Divos II poly storage tank split a six inch hole about two feet from the bottom of the tank. The break caused approximately 2,500 gallons of Divos II, a cleaning chemical composed of 18% Phosphoric Acid and 29% Nitric Acid, to leak into the containment area.

Alto maintenance personnel started pumping Divos II out of the containment area into a bulk truck around 6:30 a.m. Repair of the poly tank could not be made.

At approximately 7:15 a.m. the Divos II on the floor of the containment area dissolved a metal leg of a bulk storage tank containing Sodium Hydroxide (caustic 50%), causing the tank to tip. A plastic caustic pipe connecting two caustic tanks broke and 3,300 gallons of caustic leaked into the containment area mixing with Divos II. The containment room then filled with possible hazardous fumes.

The Alto Fire Department was called at approximately 7:20 a.m. to assist with the clean up of the spill.

Alto Elementary School was notified. Students were diverted to Jefferson Elementary School as a precautionary action until 12:00 p.m., as per Alto's off site contingency plan.

All local and state agencies were notified at approximately 7:45 - 8:45 a.m.

All chemicals were contained in the containment room and pumped into bulk trucks awaiting treatment.

Hydrite Chemical Company representatives and DNR personnel assisted with testing of chemicals in the containment room and on the Bulk Trucks.

It was agreed upon the chemicals would be neutralized on site and disposed of in accordance with environmental regulations thru Alto Dairy's waste water treatment plant.
