Subject: 4-230 D25 Construction Documentation Report
Sites 12.57-12.58 for the Waukesha Water Diversion Pipeline Project, 303-309 Sentry Dr, Waukesha
DNR BRRTS Activity #: 07-68-580851 (FID # 268005100)

Dear Mr. Damien:

On January 5, 2023, Donna Volk of Ramboll US Corporation (Ramboll) submitted the "4-230 D25 Construction Documentation Report" (Report) that describes the management of contaminated soil excavated from the portion of the Waukesha Water Diversion Pipeline Project adjacent to 303-309 Sentry Drive in Waukesha. The Report documented that contaminated soil excavated at this location was disposed at a landfill licensed to accept that waste. The Department of Natural Resources (DNR) finds this to be an acceptable means of managing the material, as was noted in our May 28, 2019, review of material management activities proposed for this location. The DNR is requesting no additional action to address contaminated soil remaining within this portion of the project. Any right of way holder or other party doing construction work in this area in the future must determine if non-exempt waste will be generated as part of their project and ensure that it is properly managed.

If you have any questions concerning this letter, please contact Paul Grittner at (414) 405-0764 or paul.grittner@wisconsin.gov.

Sincerely,

Paul Grittner
