Subject: RE: Right-of-Way Contamination Notification - Former Remington Oil Fueling Facility - Tomahawk, WI

Travis,
After speaking with our city clerk, I am willing to waive the 30 day comment period for the site in question on behalf of the City of Tomahawk.

Subject: Right-of-Way Contamination Notification - Former Remington Oil Fueling Facility - Tomahawk, WI

Good Afternoon Nick,

We are working on behalf of Remington Oil Company to investigate, remediate and oversee the case closure process of their facility located at 224 South Tomahawk Avenue, Tomahawk, Wisconsin. As part of the case closure process, we are required to notify any property owners of which the contamination extends to. Specifically, the plume of contaminated groundwater extends beneath an alley right-of-way directly west of our subject property, which the City of Tomahawk owns. I have attached the WDNR Notification Letter that we are required to send the off-site property owner. As the Streets Leadperson for Public Works, I figured you are the best initial contact for this request. The off-site property owner is allowed 30-days to comment on the letter before WDNR can grant formal closure to the site. I will mail out a copy of the letter tomorrow for your records. If you are willing, it would be appreciated if you/City of Tomahawk are willing to waive the 30-day comment period so closure can be granted to the site.

I have copied our project manager at WDNR (Carrie Stoltz) if you have any questions or concerns.

Thank you,

Travis J. Manser
