TANK REMOVAL SITE ASSESSMENT REPORT

On October 12, 1990, at approximately 9:00 A.M., I reported to the Indianhead Truck Line, Inc. terminal, located at 315 Main Street, Chippewa Falls, WI, 54729, for the purpose of removing one (1) 10,000 gallon diesel fuel storage tank buried approximately seventy per cent in the ground and thirty per cent above ground. The above ground portion was covered with dirt. The tank was completely dry of any product. I put CO2 in the tank to create a blanket of inert gas for safety purposes.

Thereafter, I dug a ditch on each side of the tank and at the ends in order to lift the tank out of the ground. Upon removal of the tank from the ground, I examined the tank to ascertain its condition, including scraping the tank in various areas, and found no leaks or signs of leaks. I then inspected the hole where the bottom of the tank rested. There was no free product, no visual signs of contamination, and no smell of contamination in the hole. I then took three samples of dirt, one at each end of the tank bed and one at the center. The samples were placed in an insulated cooler containing artificial ice, a Chain of Custody form was executed, and both were given to Craig Hoepner of Indianhead for shipment to Indianhead Truck Line, Inc., Roseville to be taken to Serco Laboratories, Inc., Roseville, MN for analysis.

Frank Braswell, Fire Inspector, Chippewa Falls, WI Fire Department, John Anderson, Department of Industry, Labor and Human Relations, Chippewa Falls, WI office, and Craig Hoepner, Manager at Indianhead, were in attendance and observed the above conditions.

Thereafter, I filled in the hole and brought in some clean fill to complete the filling and leveled off the area.

The tank was removed to my property, Proud Excavating, Inc., Route #5, Box 299, Chippewa Falls, WI, 54729.
