

Fig 36

Aquatic Plant Data for Basins A and B of Legend Lake

Wahtoosa (A) and Skice (B) Basins,
Menominee Reservation/County, Wisconsin

Plant Survey Performed July, 1993 Using SCUBA

(For each transect: number of depths sampled;
average biomass (grams per sq. m.) with standard deviation;
species relative frequency with environmental values)

Key for Environmental Value Labels	
E - excellent food source	FF - fish food
G - good food source	C - fish cover
F - fair food source	N - nuisance
P - poor food source	S - spawning

source: Attributes of Wisconsin Lake Plants
(Nichols and Verrill, 1991)

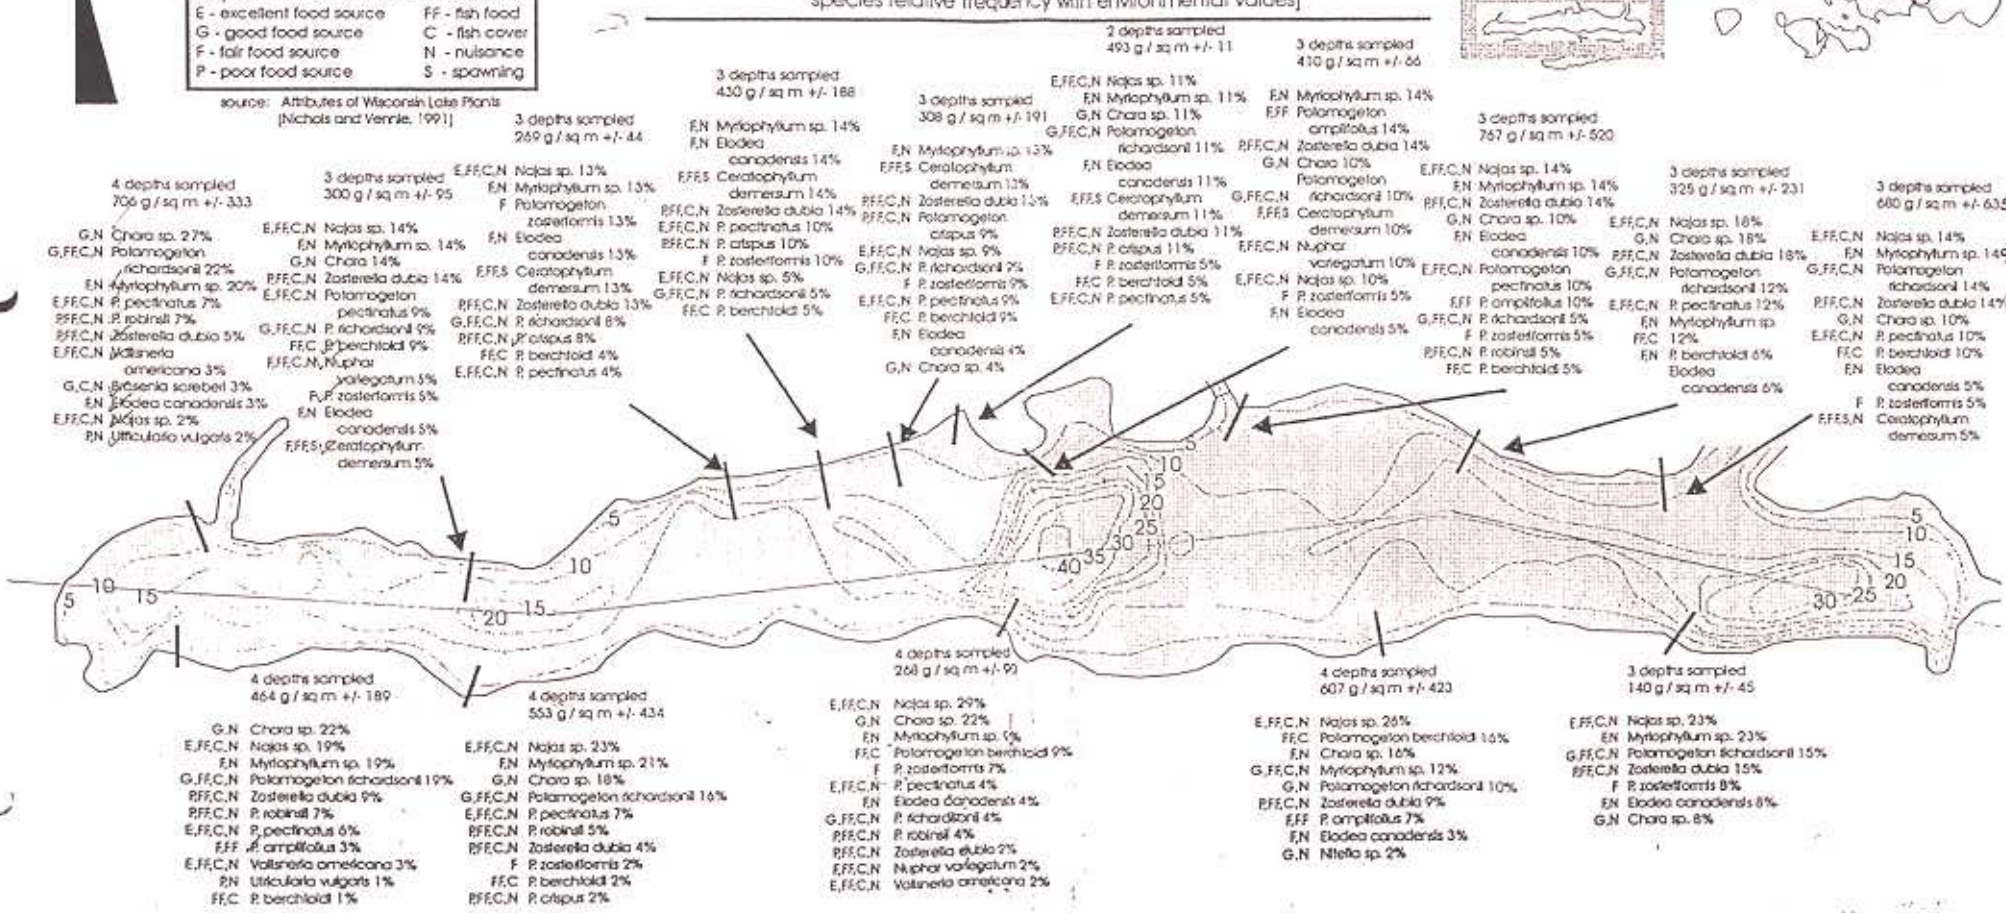

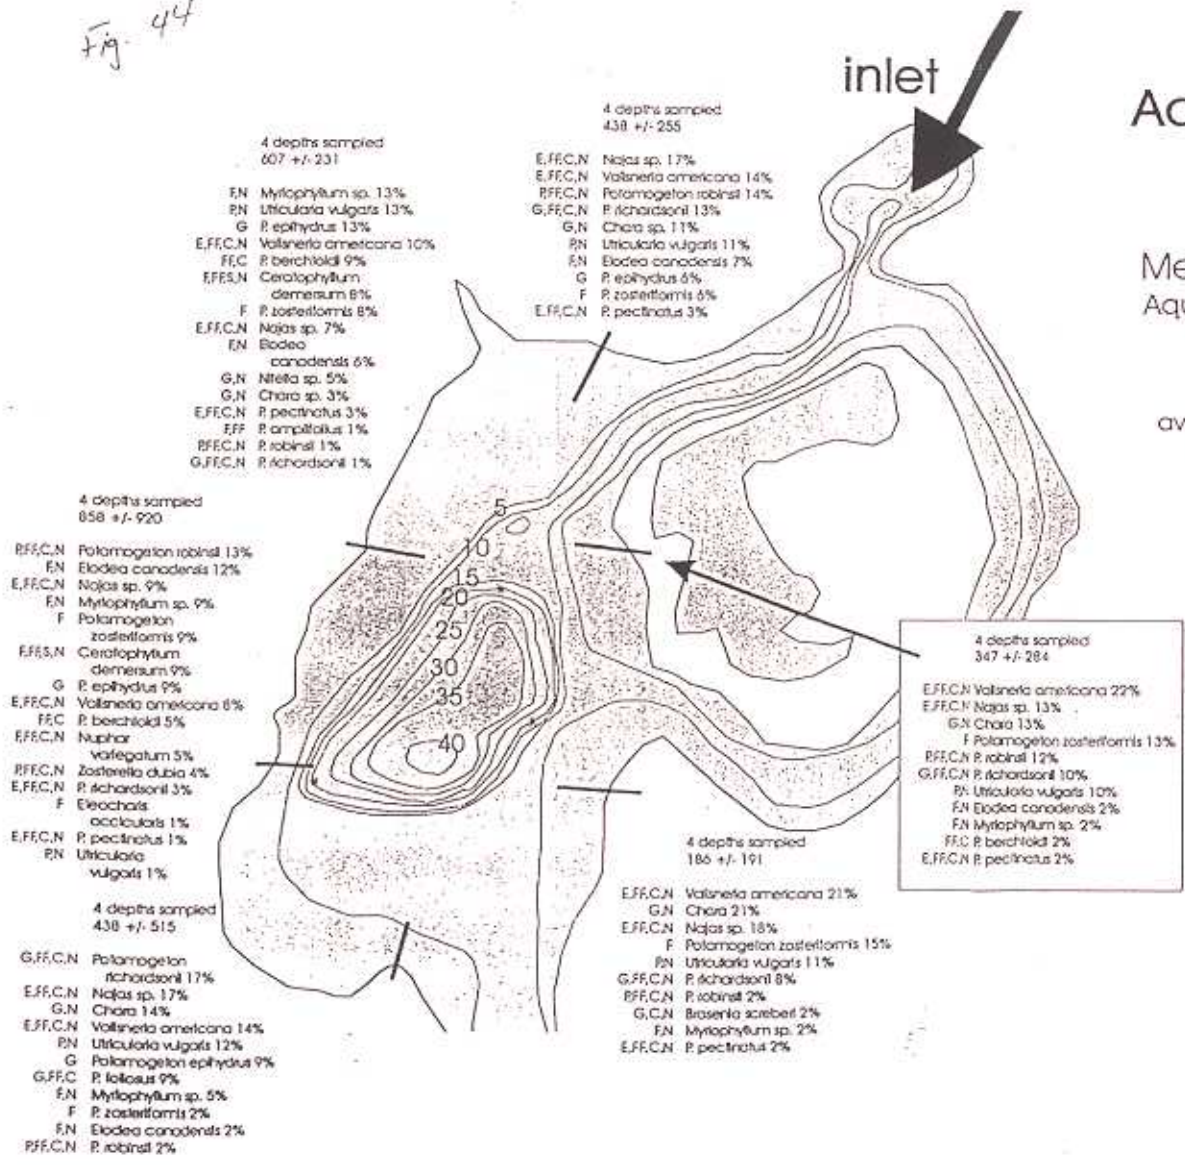

Fig 44

Aquatic Plant Data for Basin D of Legend Lake

Pestiga (D) Basin
Menominee Reservation/County, Wisconsin
Aquatic Plant Survey Performed July, 1993 Using SCUBA

[For each transect: number of depths sampled; average biomass (grams per sq. m.) with standard deviation; species relative frequency with environmental values]

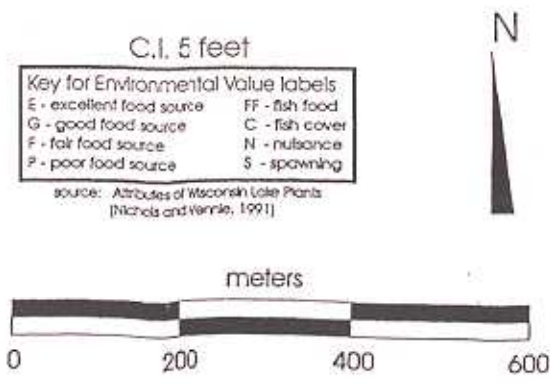

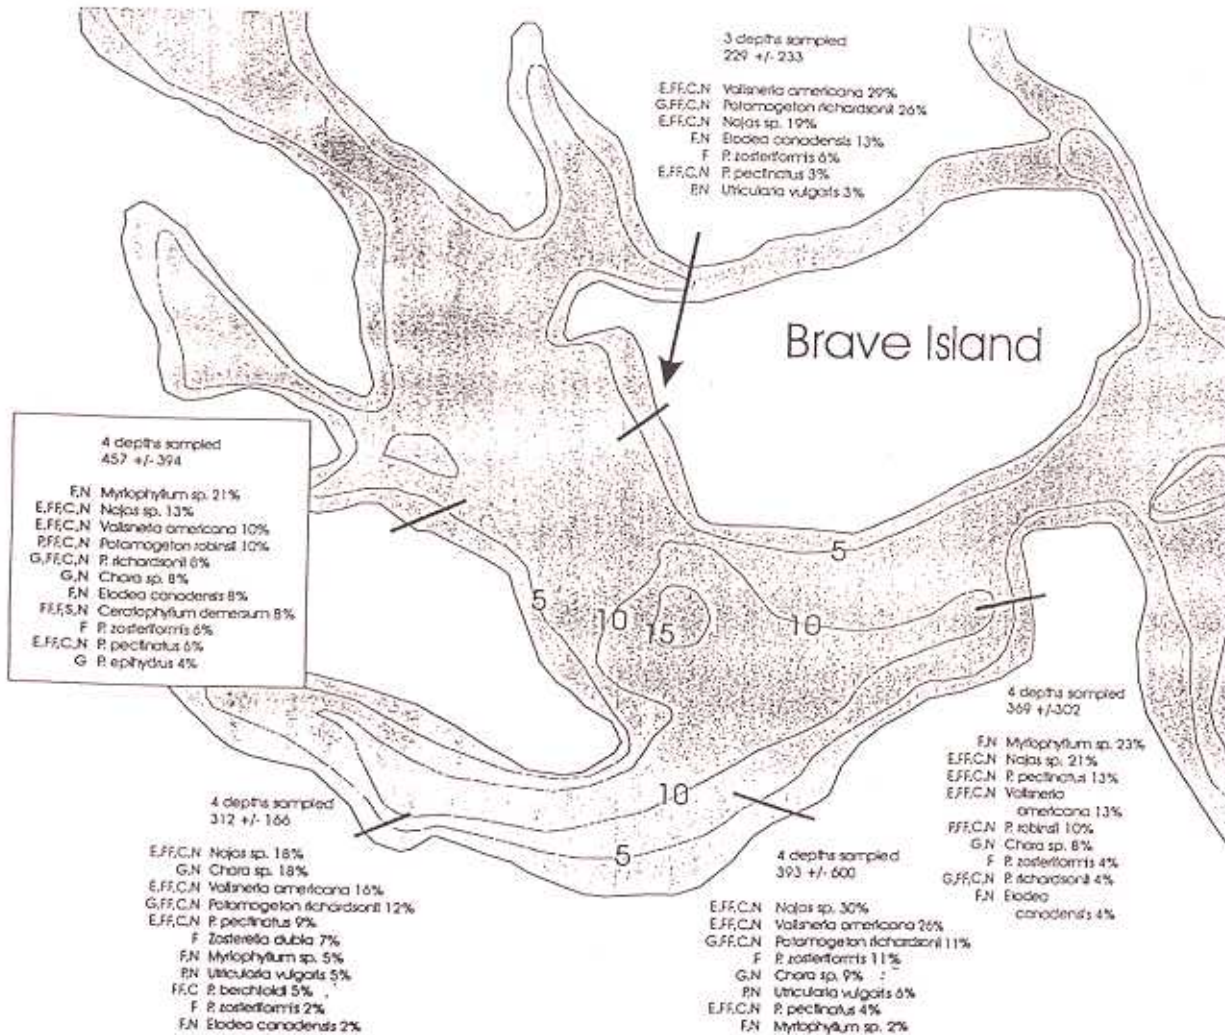

Fig 48

Aquatic Plant Data for Basin E of Legend Lake

Little Blacksmith (E) Basin,
Menominee Reservation/County, Wisconsin
Aquatic Plant Survey Performed July, 1993 Using SCUBA

[For each transect: number of depths sampled;
average biomass (grams per sq. m.) with standard deviation;
species relative frequency with environmental values]

C.I. 5 feet

Key for Environmental Value labels	
E - excellent food source	FF - fish food
G - good food source	C - fish cover
F - fair food source	N - nuisance
P - poor food source	S - spawning

source: Attributes of Wisconsin Lake Plants
(Mehals and Verrie, 1991)

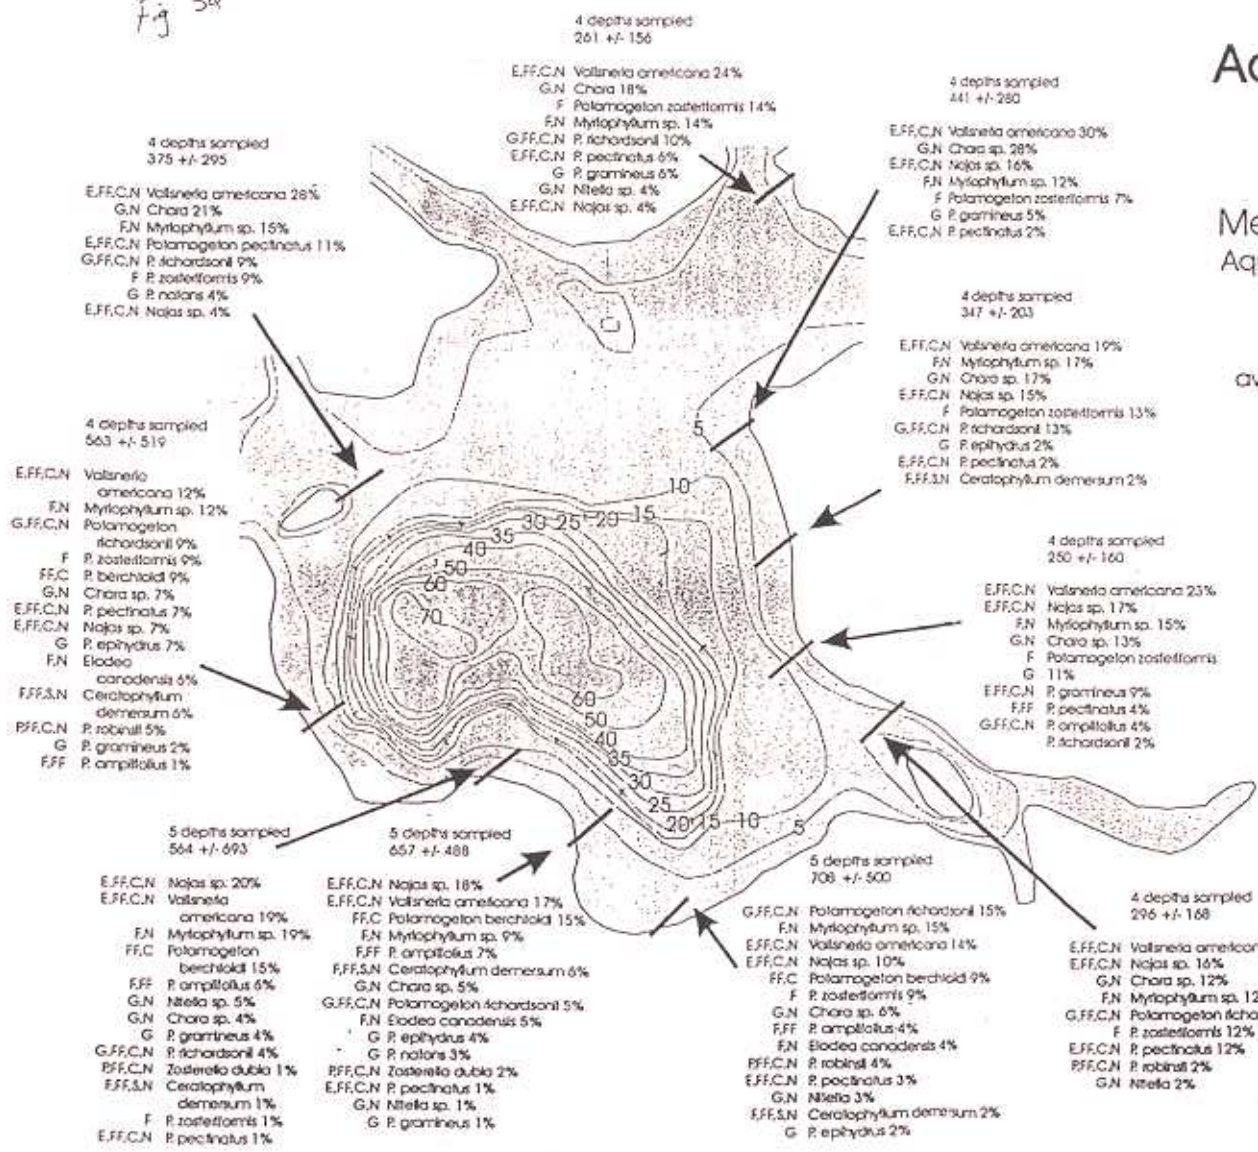

Fig 5a

Aquatic Plant Data for Basin F of Legend Lake

Big Blacksmith (F) Basin

Menominee Reservation/County, Wisconsin

Aquatic Plant Survey Performed July, 1993 Using SCUBA

[For each transect: number of depths sampled; average biomass (grams per sq. m.) with standard deviation; species relative frequency with environmental values]

C.I. 5 feet

Key for Environmental Value labels

E - excellent food source	FF - fish food
G - good food source	C - fish cover
F - fair food source	N - nuisance
P - poor food source	S - spawning

source: *Attributes of Wisconsin Lake Plants*
Nichols and Verette, 1991]

Fig 5b

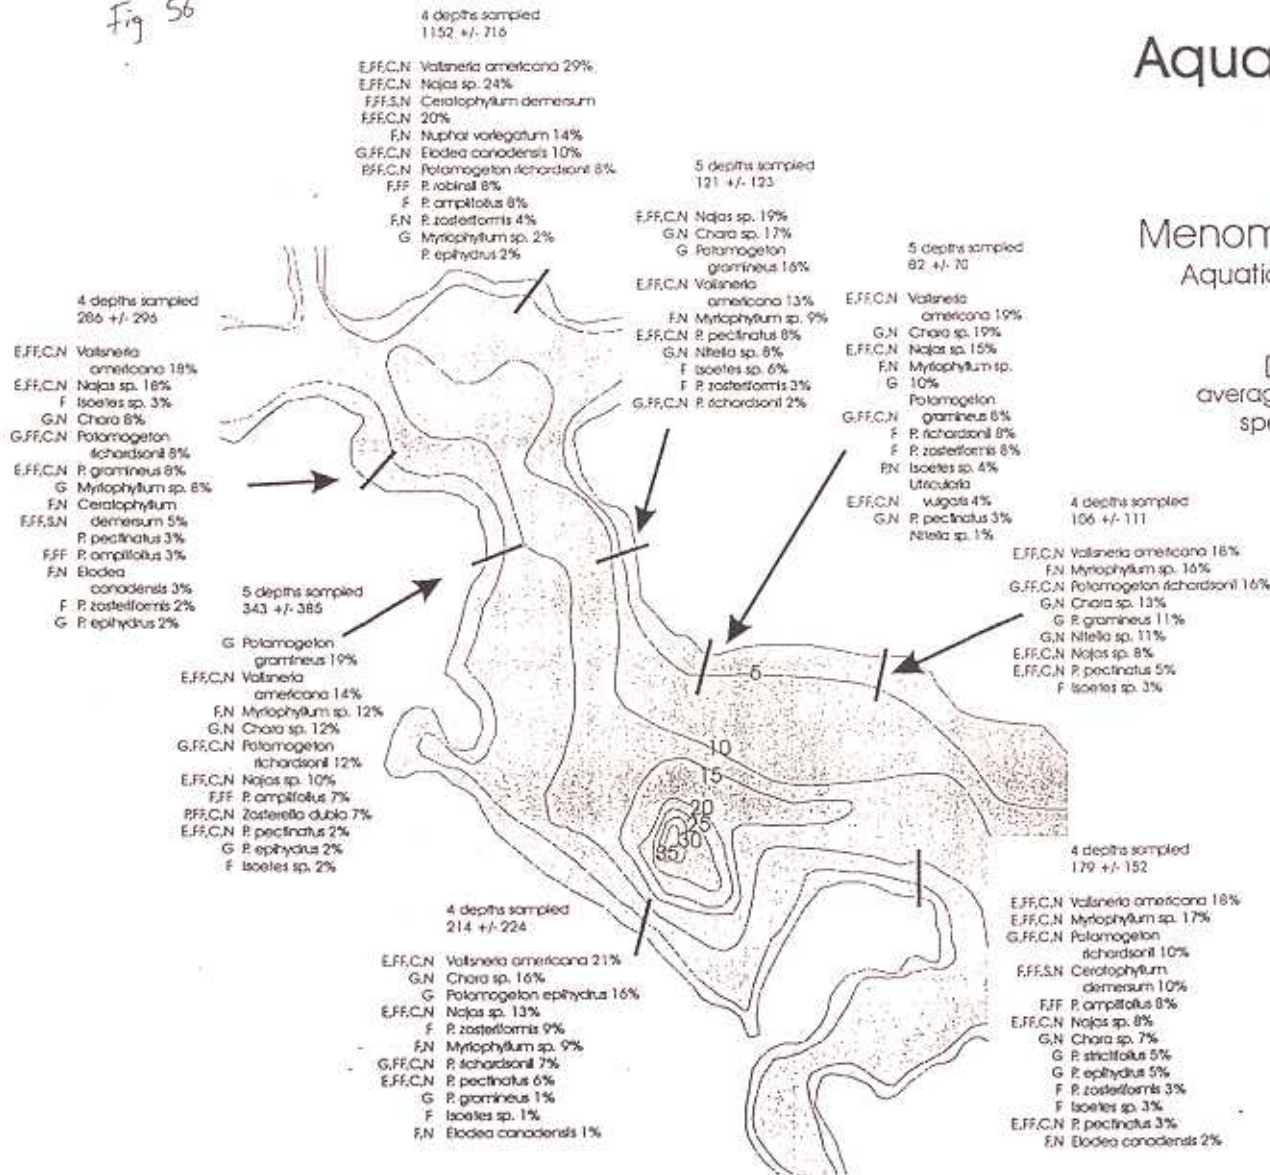

Aquatic Plant Data for Basin G of Legend Lake

Sapokisick (G) Basin

Menominee Reservation/County, Wisconsin

Aquatic Plant Survey Performed July, 1993 Using SCUBA

[For each transect: number of depths sampled; average biomass (grams per sq. m.) with standard deviation; species relative frequency with environmental values]

C.I. 5 feet

Key for Environmental Value labels:	
E - excellent food source	FF - fish food
G - good food source	C - fish cover
F - fair food source	N - nuisance
P - poor food source	S - spawning

source: Attributes of Wisconsin Lake Plants (Nichols and Verette, 1991)

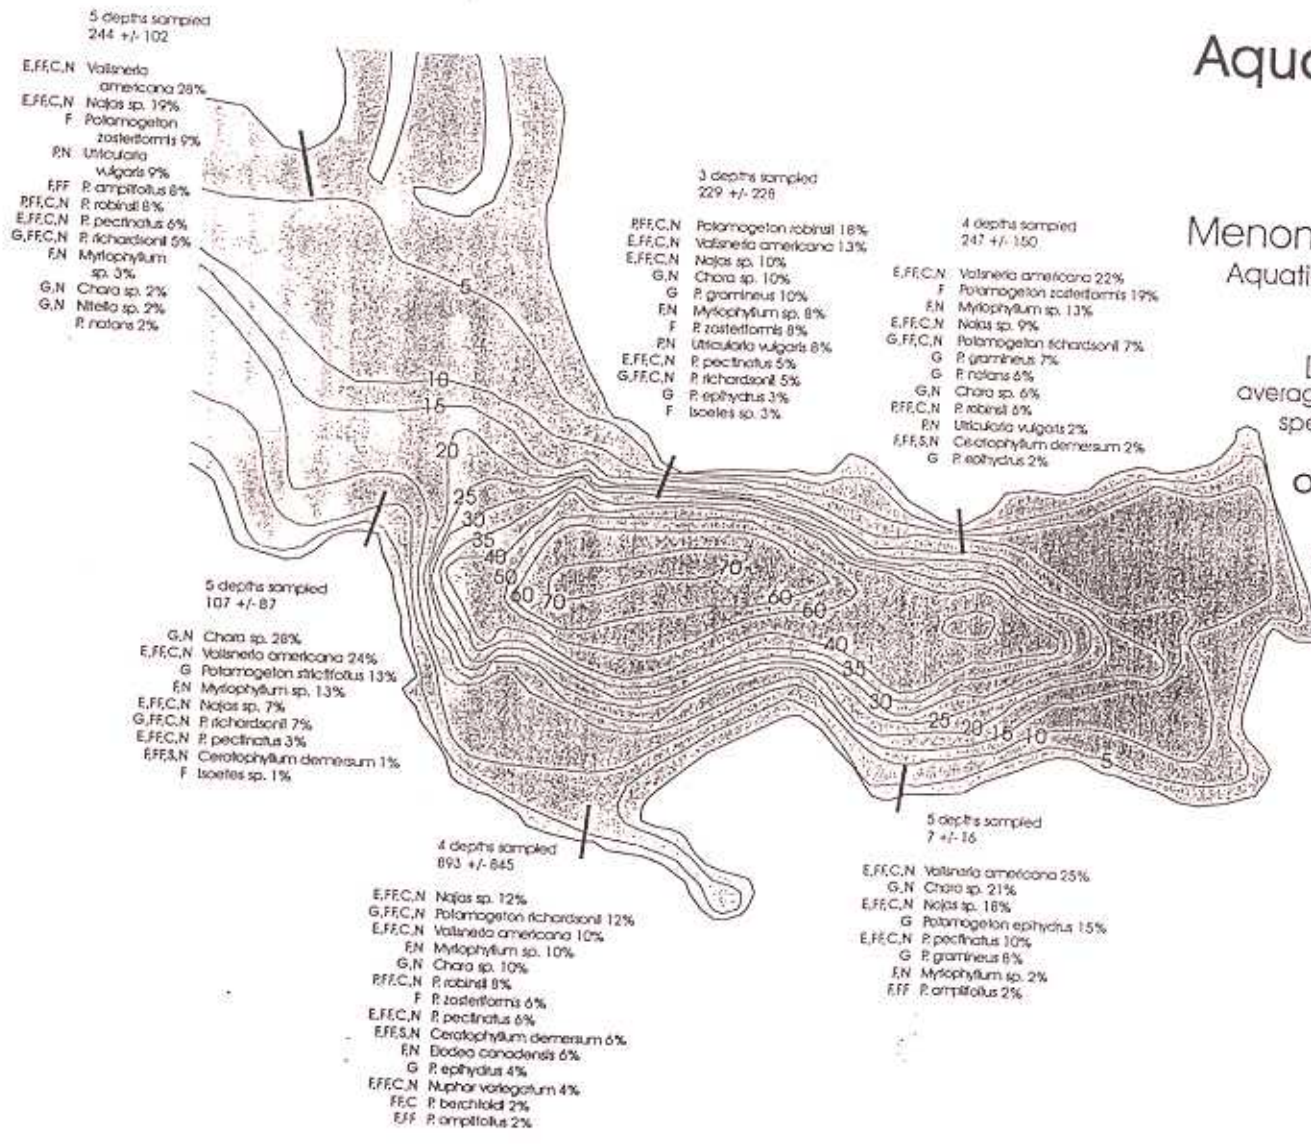

Fig. 60

Aquatic Plant Data for Basin H of Legend Lake

Pywaosit (H) Basin

Menominee Reservation/County, Wisconsin
Aquatic Plant Survey Performed July, 1993 Using SCUBA

[For each transect: number of depths sampled; average biomass (grams per sq. m.) with standard deviation; species relative frequency with environmental values]

outlet

C.I. 5 feet

Key for Environmental Value labels	
E - excellent food source	FF - fish food
G - good food source	C - fish cover
F - fair food source	N - nuisance
P - poor food source	S - spawning
