Lake Management Planning

NR 107 – Aquatic Plant Management

Conditions

- (1) The department may stop or limit the application of chemicals to a body of water if at any time it determines that chemical treatment will be ineffective, or will result in unreasonable restrictions on current water uses, or will produce unnecessary adverse side effects on non-target organisms.
- (4) Treatment of areas containing high value species of aquatic plants shall be done in a manner which will not result in adverse long-term or permanent changes to a plant community in a specific aquatic ecosystem.

How do herbicides work?

- **2,4-D** – absorbed by plant tissue; inhibits plant growth and cell division (auxin hormone mimic)
- **Triclopyr** – absorbed by plant tissue; inhibits plant growth and cell division (auxin hormone mimic)
- **Endothall** – commonly referred to as a contact herbicide, inhibits respiration and protein synthesis, disrupts cell membranes
- **Fluridone** – inhibits plant-specific enzyme (carotene) which protects chlorophyll from UV (sun) damage
- **Diquat** – Inhibits photosynthesis & destroys cell membranes

Are herbicides “safe?”

Registration by the EPA does not mean that the use of the herbicide poses no risk to humans or the environment, only that the benefits have been determined to outweigh the risks .

Because product use is not without risk, the EPA does not define any pesticide as “safe.”

Non-native Aquatic Plants

Curly-leaf Pondweed

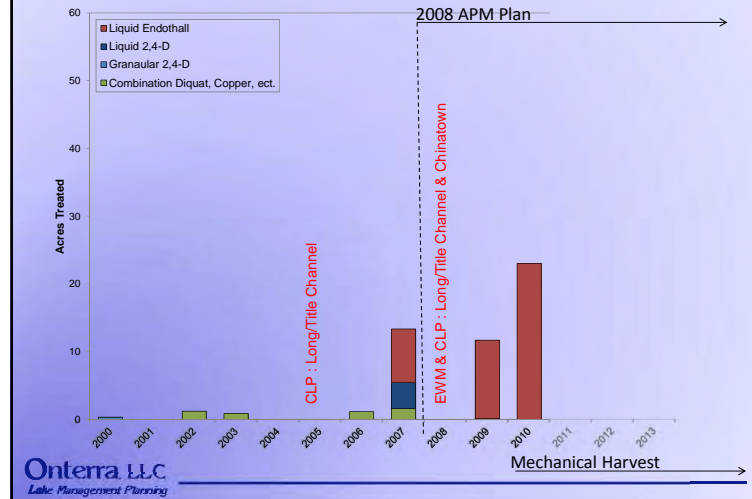

Non-native Aquatic Plants

Eurasian Water Milfoil

Lake Management Planning

Why create a lake management plan?

- To create a better understanding of lake’s positive and negative attributes.
- To discover ways to minimize the negative attributes and maximize the positive attributes.
- To update ongoing management strategies, goals, expectations, and triggers.
- To foster realistic expectations and dispel myths.
- To create a snapshot of the lake for future reference and planning.

The Planning Process

...it’s not as easy as you may think.

Develop AIS Control Strategy & Monitoring Plan

Control Strategy

- Realistic and ecologically beneficial for the lake
- Inline with lake group's lake management goals
- Based upon lake group's support for various methods (e.g. drawdown, herbicide use)
- Prioritization based upon financial limitations and/or volunteerism
- Obtain support from additional management entities

Monitoring Plan

- Collection of Pretreatment & Post Treatment Data

Onterra, LLC

Elements of an Effective Lake Management Planning Project

Data and Information Gathering *Environmental & Sociological* **Planning Process** *Brings it all together*

Onterra, LLC
Lake Management Planning

Data and information gathering

- Study Components
 - Water Quality Analysis
 - Watershed Assessment
 - Aquatic Plant Surveys
 - Fisheries Data Integration
 - Shoreline Assessment
 - Stakeholder Survey

Onterra, LLC
Lake Management Planning

Water Quality Analysis

- General water chemistry (current & historic)
 - Citizens Lake Monitoring Network
- Nutrient analysis
 - Lake trophic state (Eutrophication)
 - Limiting plant nutrient
- Supporting data for watershed modeling

Onterra, LLC
Lake Management Planning

Watershed Assessment

- Delineation of drainage basin
- Modeling
 - Land cover
 - Phosphorus loading
 - Scenario development

Onterra, LLC
Lake Management Planning

Aquatic Plant Surveys

- Concerned with both native and non-native plants

Onterra LLC
Lake Management Planning

Non-native Aquatic Plants

Curly-leaf Pondweed

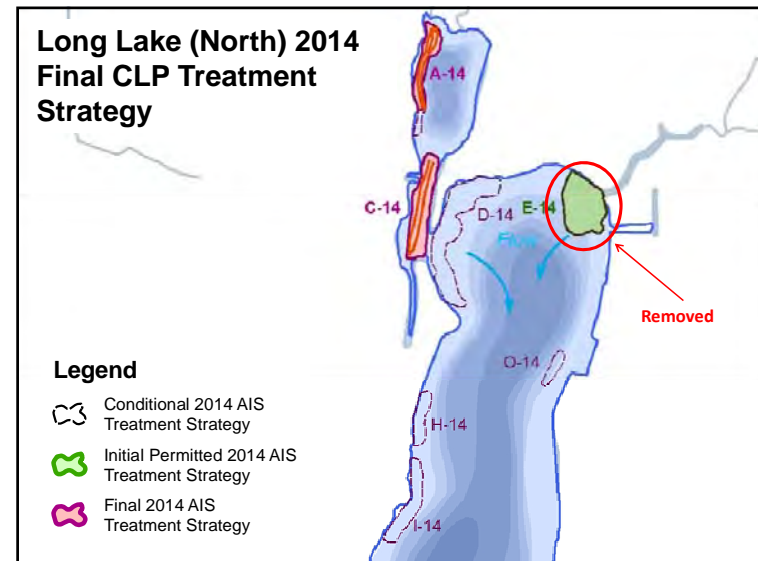

Onterra LLC
Lake Management Planning

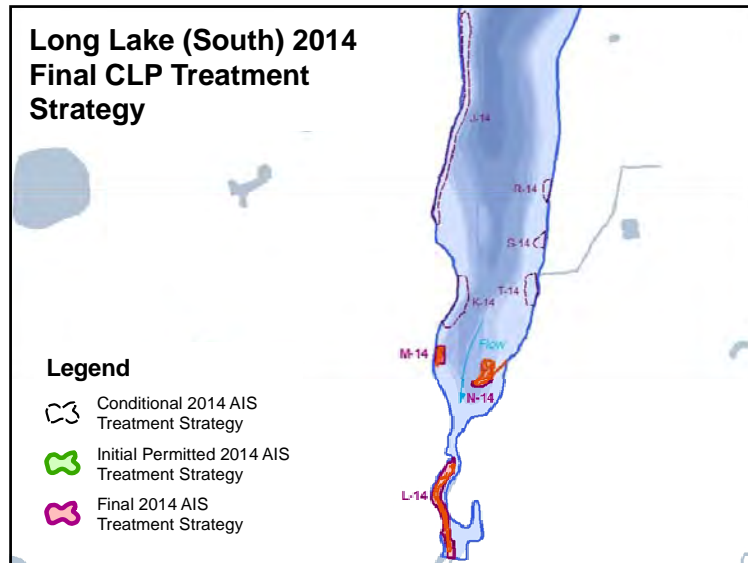

Non-native Aquatic Plants

Eurasian Water Milfoil & Hybrid Water Milfoil

Onterra LLC
Lake Management Planning

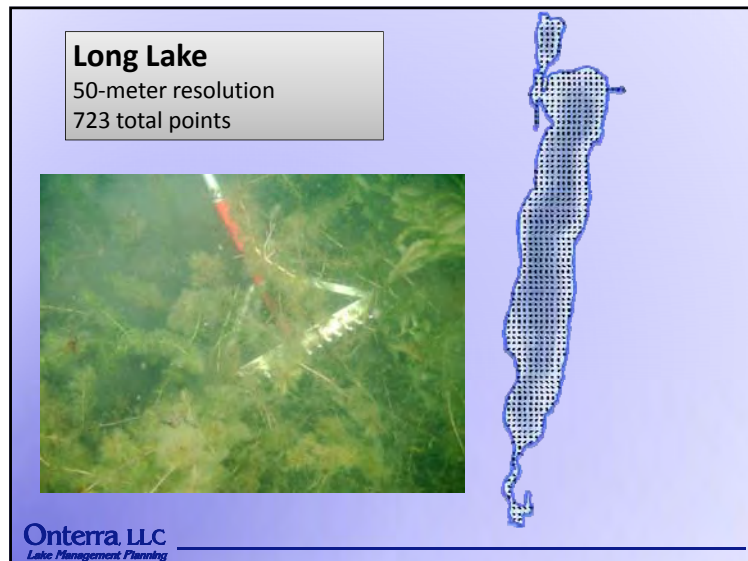

Aquatic Plant Surveys

- Concerned with both native and non-native plants
- Multiple surveys used in assessment
 - Early-season AIS survey
 - Point-intercept survey

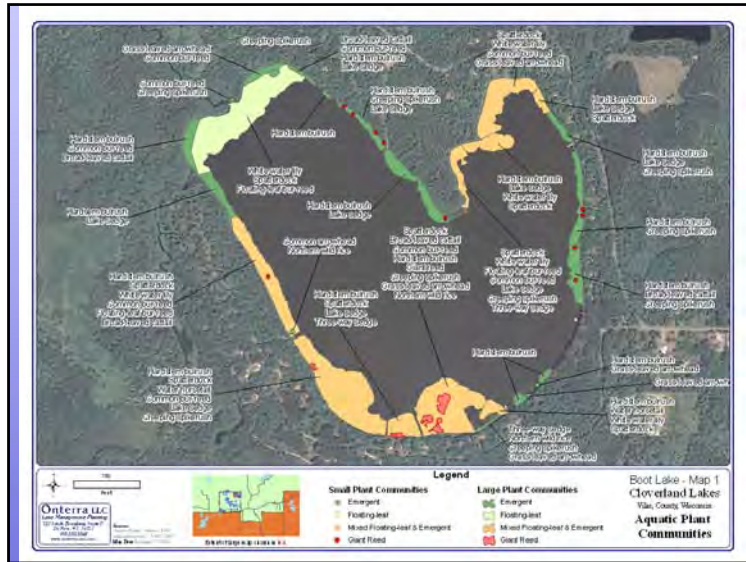

Onterra, LLC
Lake Management Planning

Aquatic Plant Surveys

- Concerned with both native and non-native plants
- Multiple surveys used in assessment
 - Early-season AIS Survey
 - Point-intercept survey
 - Aquatic plant community mapping

Onterra, LLC
Lake Management Planning

Aquatic Plant Surveys

- Concerned with both native and non-native plants
- Multiple surveys used in assessment
 - Early-season AIS Survey
 - Point-intercept survey
 - Aquatic plant community mapping
 - Volunteer survey findings

Onterra, LLC
Lake Management Planning

Fisheries Data Integration

- No fish sampling completed
- Assemble data from WDNR, USGS, USFWS, & GLIFWC
- Fish survey results summaries (if available)
- Use information in planning as applicable

Onterra, LLC
Lake Management Planning

Stakeholder Survey

- Standard survey used as base
 - Planning committee potentially develops additional questions and options
 - Must not lead respondent to specific answer through a “loaded” question
- Survey must be approved by WDNR

Onterra, LLC
Lake Management Planning

Shoreland Assessment

- Shoreland area is important for buffering runoff and provides valuable habitat for aquatic and terrestrial wildlife.
- It does not look at lake shoreline on a property-by-property basis.
- Assessment ranks shoreland area from shoreline back 35 feet

Urbanized

Range →

Natural

Lake Management Planning

Presentation Outline

- Lake Management Planning Project Overview
- Study Results
 - Water Quality
 - Watershed
 - Shoreland
 - Aquatic Plants
 - Fishery
 - AIS
- “Big Picture”

Onterra LLC
Lake Management Planning

Study and Plan Goals

- Collect & Analyze Data
- Construct Long-Term & Useable Plan

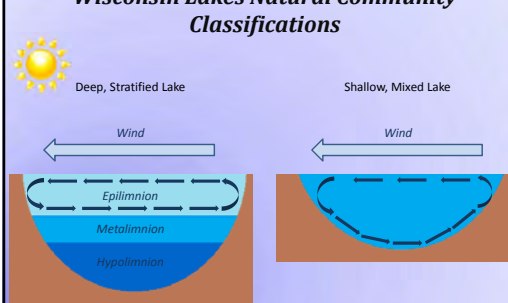

Onterra LLC
Lake Management Planning

Water Quality

Onterra LLC
Lake Management Planning

Wisconsin Lakes Natural Community Classifications

Deep, Stratified Lake

Shallow, Mixed Lake

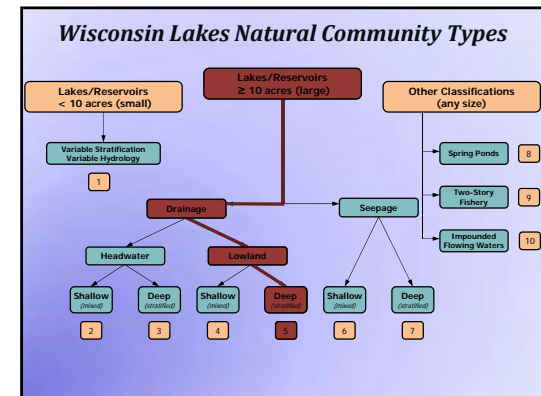

Wind

Epilimnion

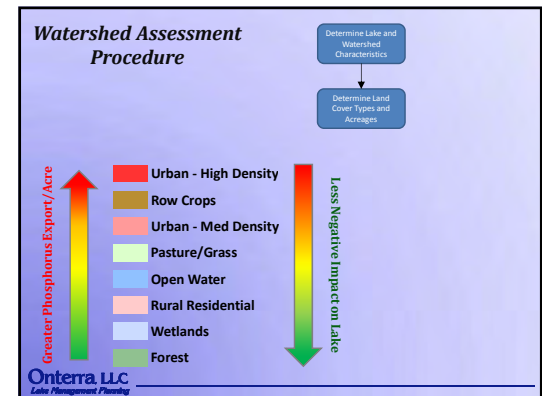

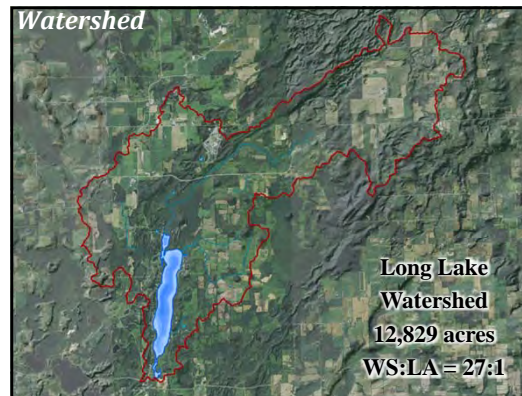

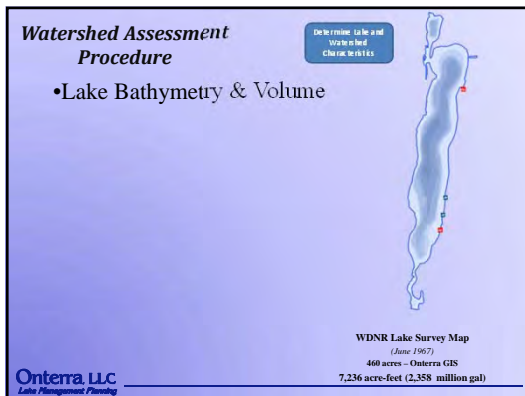

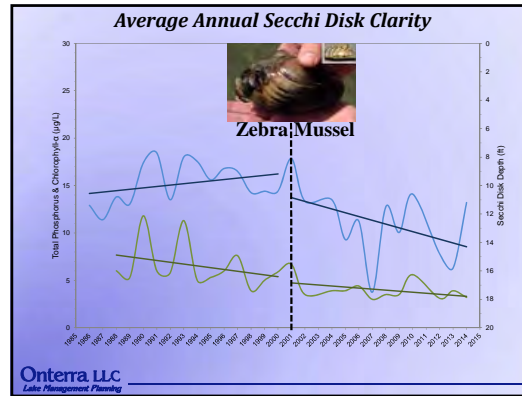

Metalimnion

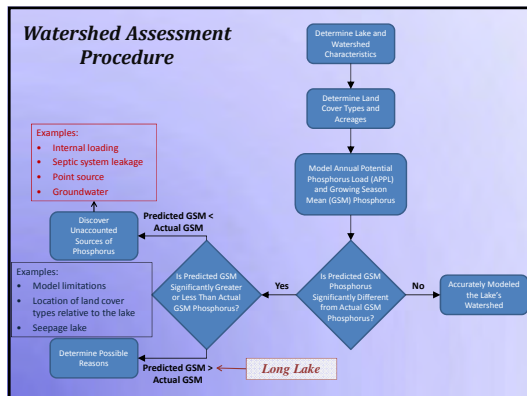

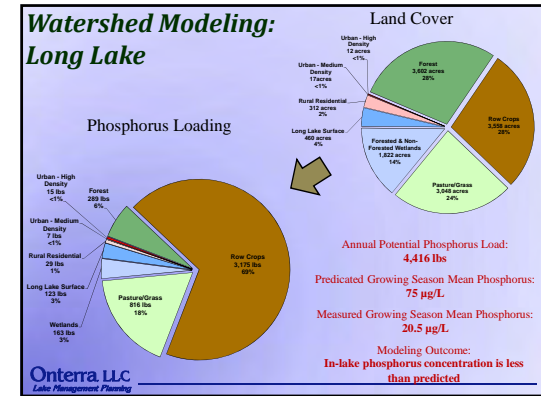

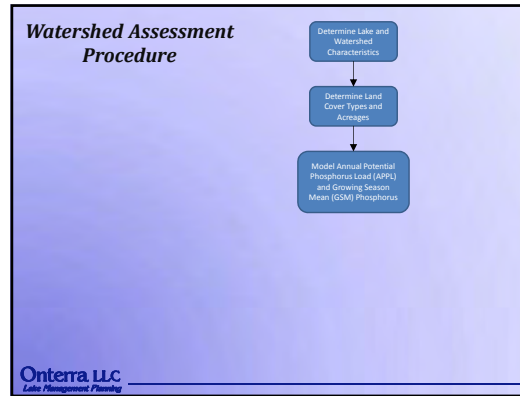

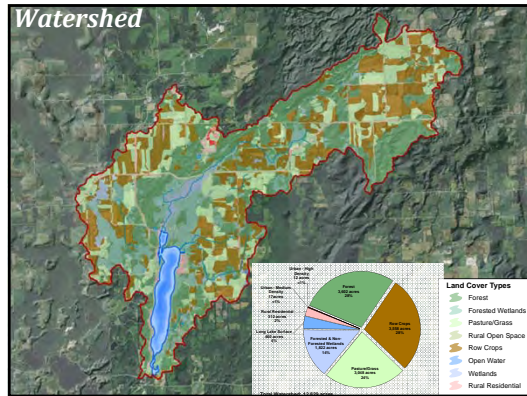

Hypolimnion

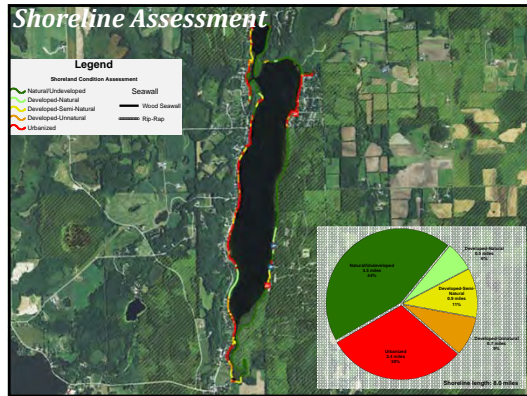

Onterra LLC
Lake Management Planning

Coarse Woody Habitat

- Provides shoreland erosion control and prevents suspension of sediments.
- Preferred habitat for a variety of aquatic life.
 - Periphyton growth fed upon by insects.
 - Refuge, foraging and spawning habitat for fish.
 - Complexity of CWH important.
- Changing of logging and shoreland development practices = reduced CWH in Wisconsin lakes.
- Survey aimed at quantifying CWH in the Lake

40 total pieces of emergent CWH located
Long Lake ratio = 5 CWH pieces per shoreland mile
"Natural" lakes = >300:1 ratio

Onterra LLC
Lake Management Planning

Long Lake Fishery - Travis Motl, WDNR

- Managed for LMB, NP, Walleye, and Panfish
- Walleye
 - Small fingerling walleye stocked every-other year
 - Maintain a recreational opportunity as limited or no natural reproduction
- Northern Pike
 - Self-sustaining
 - High density
 - Slow Growing
 - Special Regulation to increase harvest and effort - no size limit

Onterra LLC
Lake Management Planning

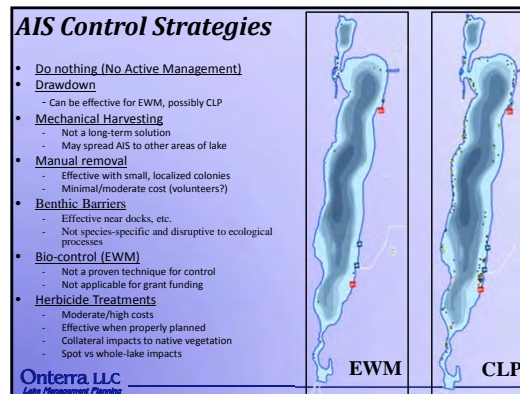

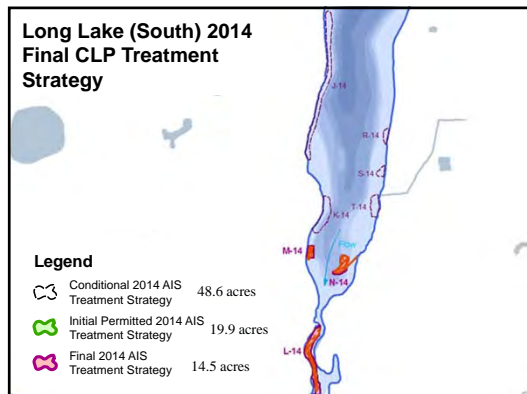

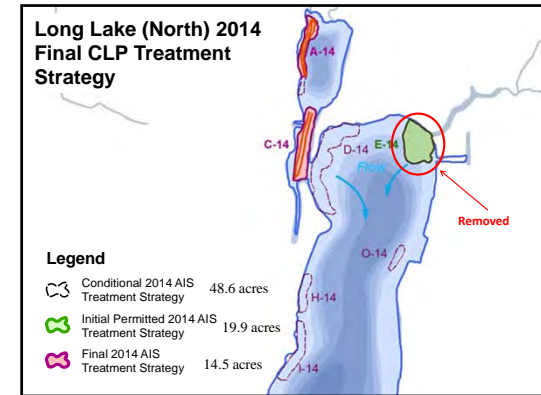

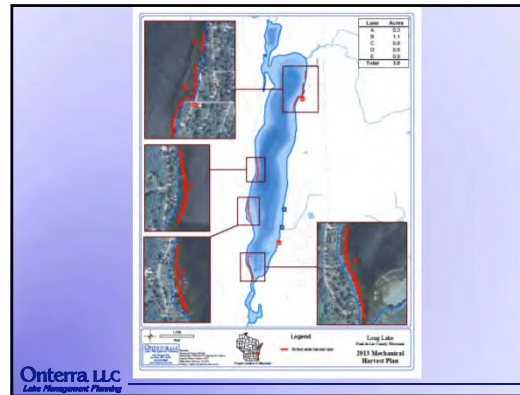

Aquatic Plant Summary

Long Lake

- 47 native species
- 4/5 non-native plant species
 - Eurasian/Hybrid water milfoil
 - Curly-leaf Pondweed
 - Purple Loosestrife
 - Reed Canary Grass
- Maximum depth of plants = ave of 17-19 feet

Active Management Philosophy

Onterra LLC
Lake Management Planning

Active Management Philosophy

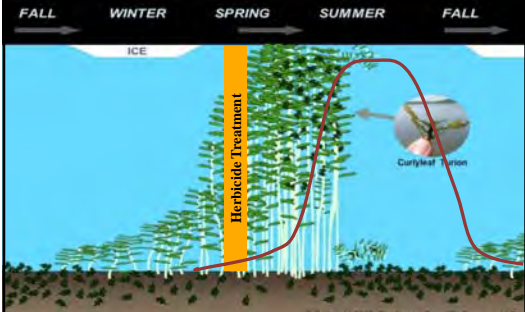

Traditionally "we" thought that all AIS are bad and they need to be controlled at all costs.

But...is it really that simple?

Onterra LLC
Lake Management Planning

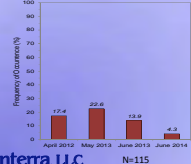

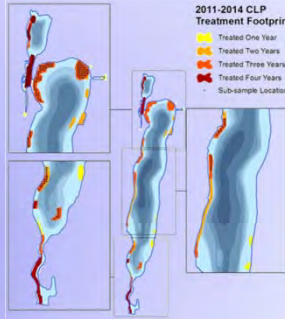

Curly-leaf Pondweed

Onterra LLC
Lake Management Planning

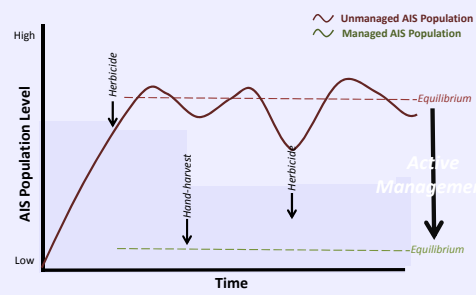

Active Management Philosophy

- Turions may be viable in sediment for 5-7 years
- Repeated targeted of areas is required in CLP management

Onterra LLC
Lake Management Planning

Hypothetical EWM Populations

Onterra LLC
Lake Management Planning

Active Management Discussion

Pros	Cons
<ul style="list-style-type: none"> Keep AIS population low so native ecosystem can function as it did prior to AIS Keep AIS population low so the lake is not a source population for other nearby lakes Keep AIS population low so does not cause recreational, navigational, or aesthetic issues 	<ul style="list-style-type: none"> Management action itself may be ecological damaging to the lake, either through improper implementation or unintended/unknown impacts Management action may not be fully supported by public Equilibrium <i>Unmanaged</i> AIS population may be low enough to not cause large ecosystem or user conflicts

Onterra LLC
Lake Management Planning

Herbicide Control 101

Onterra LLC
Lake Management Planning

How do they work?

- **2,4-D** – absorbed by plant tissue; inhibits plant growth and cell division (auxin hormone mimic)
- **Triclopyr** – absorbed by plant tissue; inhibits plant growth and cell division (auxin hormone mimic)
- **Endothall** – commonly referred to as a contact herbicide, inhibits respiration and protein synthesis, disrupts cell membranes
- **Fluridone** – inhibits plant-specific enzyme (carotene) which protects chlorophyll from UV (sun) damage
- **Diquat** – Inhibits photosynthesis & destroys cell membranes

Onterra LLC
Lake Management Planning

Are herbicides “safe?”

Registration by the EPA does not mean that the use of the herbicide poses no risk to humans or the environment, only that the **benefits** have been determined to **outweigh** the **risks**.

Because product use is not without risk, the EPA does not define any pesticide as “safe.”

Onterra LLC
Lake Management Planning

WDNR Administrative Code (NR 107): Aquatic Plant Management Conditions

- (1) The department may **stop or limit** the application of chemicals to a body of water if at any time it determines that chemical treatment will be **ineffective**, or will result in unreasonable restrictions on current water uses, or will produce unnecessary **adverse side effects on non-target organisms**.
- (4) Treatment of areas containing high value species of aquatic plants shall be done in a manner which will **not result in adverse long-term or permanent changes to a plant community** in a specific aquatic ecosystem.

Underscores the importance of proper planning and monitoring

Onterra LLC
Lake Management Planning

Early-season Herbicide Control Strategy

- Exotic species are small, actively growing, and most vulnerable
- Many native species are dormant
- Cool water temperatures result in slower microbial degradation
- Minimize biomass decomposition

Herbicide Use Patterns

- **Dissipation: horizontal and vertical movement of herbicide within the water column**
 - Water flow
 - Wind
 - Treatment area relative to lake
 - Water depth
- **Degradation: physical breakdown of herbicide into inert components**
 - Microbial
 - Photolytic

Herbicide Use Patterns

Onterra LLC
Lake Management Planning

- ### Factors that Result in Increased CET
- **Large Treatment Sites**
 - Especially over 5 acres
 - **Broad-shaped Sites**
 - Long, skinny shapes act like small sites
 - **Physical Barriers**
 - Dilution doesn't occur in all directions
 - Eddy effects
 - **Low Water Exchange**
 - Flow
 - Wave-action
- Onterra LLC
Lake Management Planning
-

- ### Conclusions
- Water quality is "Good"
 - Excellent historical data
 - Trends detected, likely as a result of ZM establishment
 - Watershed is in "Fair" condition
 - Watershed contains a variety of land cover types, including approximately half in *Row Crop or Pasture/Grass*
 - Modeling was not effective, likely due to large state-owned area of buffer
 - Shoreland zone is polar mix of *Natural/Undeveloped* and *Urbanized*
- Onterra LLC
Lake Management Planning

- ### Conclusions continued
- Aquatic plant community
 - Based upon standard analysis, native plant community is of high quality
 - High diversity, number of species
 - Species present are of good quality
 - Aquatic plant community has changed little from 2007-2014
 - Concerns over AIS
 - Fisheries
 - Not Yet Addressed – in progress
 - Stakeholder Survey
 - Not Yet Addressed – in progress
- Onterra LLC
Lake Management Planning

APPENDIX B

Stakeholder Survey Response Charts and Comments

Long Lake Property Owners Association - Anonymous Stakeholder Survey

Surveys Distributed: 292
Surveys Returned: 69
Response Rate: 24%

Long Lake Property

1. How is your property on Long Lake utilized?

Answer Options	Response Percent	Response Count
A year round residence	37.7%	26
Visited on weekends throughout the year	30.4%	21
Seasonal residence (summer only)	23.2%	16
Undeveloped	1.4%	1
Resort property	0.0%	0
Rental property	0.0%	0
I am a renter and do not own the property	4.3%	3
Other (please specify)	2.9%	2
answered question		69
skipped question		0

Number	Other (please specify)
1	Live in NC now. Was my year round residence from 1982 - 2006. Visit during the summer and at other times during the year.
2	Not a property owner

2. How many days each year is your property used by you or others?

Answer Options	Response Count
answered question	
64	
skipped question	
5	

Category (# of days)	Responses	Count	Percentage
0 to 100		30	17%
101 to 200		41	23%
201 to 300		41	23%
301 to 365		64	36%

3. How long have you owned or rented your property on Long Lake?

Answer Options	Response Count
	65
<i>answered question</i>	65
<i>skipped question</i>	4

Category (# of years)	Responses	% Response
0 to 5	10	6%
6 to 10	23	14%
11 to 15	32	19%
16 to 20	38	23%
21 to 25	44	26%
>25	21	13%

4. Is your property located on the shoreline of Long Lake (lakefront property) or not located on the lake's shoreline (not lakefront property)?

Answer Options	Response Percent	Response Count
Lakefront property	78.8%	52
Not lakefront property	21.2%	14
<i>answered question</i>		66
<i>skipped question</i>		3

5. What type of septic system does your property utilize?

Answer Options	Response Percent	Response Count
Holding tank	60.0%	30
Conventional system	32.0%	16
Mound	2.0%	1
Advanced treatment system	2.0%	1
Municipal sewer	0.0%	0
Do not know	2.0%	1
No septic system	2.0%	1
<i>answered question</i>		50
<i>skipped question</i>		19

6. How often is the septic system on your property pumped?

Answer Options	Response Percent	Response Count
Multiple times a year	42.0%	21
Once a year	22.0%	11
Every 2-4 years	36.0%	18
Every 5-10 years	0.0%	0
Do not know	0.0%	0
answered question		50
skipped question		19

Recreational Activity on Long Lake

7. How many years ago did you first visit Long Lake?

Answer Options	Response Count
	68
answered question	68
skipped question	1

Category (# of days)	Responses	% Response
0 to 10	10	5%
11 to 20	21	10%
21 to 30	29	13%
31 to 40	41	19%
41 to 50	50	23%
51 to 60	60	27%
>60	8	4%

8. For how many years have you fished on Long Lake?

Answer Options	Response Count
	67
<i>answered question</i>	67
<i>skipped question</i>	2

Category (# of days)	Responses	% Response
0 to 10	22	8%
11 to 20	32	12%
21 to 30	44	16%
31 to 40	51	18%
41 to 50	61	22%
51 to 60	66	24%
>60	1	0%

9. Have you personally fished on Long Lake in the past three years?

Answer Options	Response Percent	Response Count
Yes	83.6%	56
No	16.4%	11
<i>answered question</i>		67
<i>skipped question</i>		2

10. What species of fish do you like to catch on Long Lake?

Answer Options	Response Percent	Response Count
Bluegill/Sunfish	62.5%	35
Yellow perch	48.2%	27
Crappie	46.4%	26
Largemouth bass	46.4%	26
Northern pike	41.1%	23
Smallmouth bass	26.8%	15
Muskellunge	3.6%	2
All fish species	33.9%	19
Other (please specify)	16.1%	9
<i>answered question</i>		56
<i>skipped question</i>		13

Number	Other (please specify)
1	Walleye
2	Walleye and Bullhead
3	Bullhead
4	walleye
5	Walleye
6	Walleye
7	walleye, rock bass, bull heads
8	walleye
9	walleye

11. How would you describe the current quality of fishing on Long Lake?

Answer Options	Very Poor	Poor	Fair	Good	Excellent	Unsure	Response Count
	0	11	22	18	5	0	56
	<i>answered question</i>						56
	<i>skipped question</i>						13

12. How has the quality of fishing changed on Long Lake since you have started fishing the lake?

Answer Options	Much worse	Somewhat worse	Remained the same	Somewhat better	Much better	Unsure	Response Count
	8	21	13	8	4	1	55
	<i>answered question</i>						55
	<i>skipped question</i>						14

13. What types of watercraft do you currently use on Long Lake?

Answer Options	Response Percent	Response Count
Pontoon	59.7%	40
Canoe/kayak	43.3%	29
Motor boat with greater than 25 hp motor	41.8%	28
Motor boat with 25 hp or less motor	29.9%	20
Rowboat	22.4%	15
Paddleboat	20.9%	14
Jet ski (personal water craft)	13.4%	9
Sailboat	3.0%	2
Jet boat	0.0%	0
Do not use watercraft	3.0%	2
answered question		67
skipped question		2

14. For the list below, rank your top three activities that are important reasons for owning or renting your property on or near Long Lake, with 1 being the most important activity.

Answer Options	1st	2nd	3rd	Response Count
Relaxing/entertaining	27	11	14	52
Fishing - open water	15	11	8	34
Motor boating	7	15	10	32
Water skiing/tubing	10	5	7	22
Swimming	3	7	7	17
Nature viewing	2	6	8	16
Ice fishing	0	6	3	9
Canoeing/kayaking	1	4	4	9
Snowmobiling/ATV	0	0	3	3
Hunting	1	0	1	2
Sailing	0	1	0	1
Jet skiing	0	0	0	0
None of these activities are important to me	0	0	1	1
Other (please specify below)	1	0	0	1
answered question				67
skipped question				2

Number	"Other" responses
1	Family home
2	Hiking and Exploring the paths around the east side park...

Long Lake Current and Historic Condition, Health and Management

15. How would you describe the current water quality of Long Lake?

Answer Options	Very Poor	Poor	Fair	Good	Excellent	Unsure	Response Count
	0	11	14	30	8	1	64
<i>answered question</i>							64
<i>skipped question</i>							5

16. How has the current water quality changed in Long Lake since you first visited the lake?

Answer Options	Severely degraded	Somewhat degraded	Remained the same	Somewhat improved	Greatly improved	Unsure	Response Count
	9	26	13	8	6	3	65
<i>answered question</i>							65
<i>skipped question</i>							4

17. Before reading the statement above, had you ever heard of aquatic invasive species?

Answer Options	Response Percent	Response Count
Yes	97.0%	64
No	3.0%	2
<i>answered question</i>		66

18. Do you believe aquatic invasive species are present within Long Lake?

Answer Options	Response Percent	Response Count
Yes	100.0%	65
No	0.0%	0
<i>answered question</i>		65

19. Which aquatic invasive species do you believe are in Long Lake?

Answer Options	Response Percent	Response Count
Eurasian water milfoil	85.9%	55
Zebra mussel	85.9%	55
Curly-leaf pondweed	76.6%	49
Carp	62.5%	40
Purple loosestrife	48.4%	31
Chinese mystery snail	9.4%	6
Rusy crayfish	4.7%	3
Flowering rush	3.1%	2
Pale yellow iris	1.6%	1
Spiny water flea	1.6%	1
Heterosporosis (Yellow perch parasite)	1.6%	1
Freshwater jellyfish	0.0%	0
Alewife	0.0%	0
Round goby	0.0%	0
Rainbow smelt	0.0%	0
I don't know but presume that AIS are present in the lake	10.9%	7
Other (please specify)	0.0%	0
answered question		64
skipped question		5

20. To what level do you believe each of the following factors may currently be negatively impacting Long Lake?

* Not Present means that you believe the issue does not exist on Long Lake.

** No Impact means that the issue may exist on Long Lake but it is not negatively impacting the lake.

Answer Options	*Not Present	**No Impact	Moderately negative impact		Great negative impact		Unsure: Need more information	Rating Average	Response Count
Aquatic invasive species introduction	0	1	1	12	13	35	2	3.19	64
Excessive aquatic plant growth (excluding algae)	0	3	3	11	9	36	3	3.02	65
Algae blooms	1	5	8	9	14	24	3	2.56	64
Watercraft traffic	1	9	13	20	6	15	2	1.98	66
Water quality degradation	2	10	6	22	11	9	5	1.83	65
Excessive fishing pressure	3	10	6	21	4	14	6	1.81	64
Loss of aquatic habitat	8	9	9	11	9	12	6	1.66	64
Shoreline development	4	17	12	11	5	13	4	1.53	66
Septic system discharge	4	12	11	10	6	11	9	1.48	63
Noise/light pollution	4	24	11	12	3	4	6	0.94	64
Other (please specify)									5
								answered question	67
								skipped question	2

Number	Other (please specify)
1	Wash Water Discharge
2	groundwater runoff from roads and roof drains
3	people abusing fish limits & no size limit on northern -negative impact
4	chemical weed control in spawning areas
5	Runoff such as highway salt and fertilizer from the watershed

21. From the list below, please rank your top three concerns regarding Long Lake, with 1 being your greatest concern.

Answer Options	1st	2nd	3rd	Response Count
Excessive aquatic plant growth (excluding algae)	20	15	10	45
Aquatic invasive species introduction	20	15	9	44
Water quality degradation	10	8	9	27
Watercraft traffic	6	11	6	23
Algae blooms	4	4	10	18
Loss of aquatic habitat	1	5	6	12
Shoreline development	4	4	4	12
Excessive fishing pressure	1	0	7	8
Septic system discharge	0	4	1	5
Noise/light pollution	0	0	2	2
Other (please specify)	0	0	1	1
	answered question			67
	skipped question			2

Number	"Other" responses
1	This year many boaters broke no wake rule, worst I've seen in 35 yrs and drive boats closely to shore/raft. Little enforcement by water police
2	chemical weed control
3	The amount of Lily Pads and Muck in front of all cottages in our area

22. During open water season how often does aquatic plant growth, including algae, negatively impact your enjoyment of Long Lake?

Answer Options	Never	Rarely	Sometimes	Often	Always	Response Count
	1	5	17	26	17	66
	<i>answered question</i>					66
	<i>skipped question</i>					3

23. Considering your answer to the question above, do you believe aquatic plant control is needed on Long Lake?

Answer Options	Definitely yes	Probably yes	Unsure	Probably No	Definitely No	Response Count
	46	13	4	3	1	67
	<i>answered question</i>					67
	<i>skipped question</i>					2

24. Aquatic plants can be managed using many techniques. What is your level of support for the responsible use of the following techniques on Long Lake?

Answer Options	Not supportive		Neutral		Highly supportive		Unsure: Need more information	Rating Average	Response Count
Mechanical harvesting	2	0	5	16	39	3	3.17	65	
Integrated control using many methods	1	0	8	6	42	5	3.02	62	
Herbicide (chemical) control	5	2	8	12	31	7	2.60	65	
Dredging of bottom sediments	7	2	7	13	26	10	2.37	65	
Manual removal by property owners	5	4	11	16	23	6	2.35	65	
Biological control (milfoil weevil, loosestrife beetle, etc)	7	3	6	13	23	12	2.25	64	
Hand-removal by divers	15	5	13	9	12	8	1.61	62	
Water level drawdown	28	4	14	2	4	11	0.92	63	
Do nothing (do not manage plants)	45	1	2	1	1	2	1.04	52	
								<i>answered question</i>	67
								<i>skipped question</i>	2

25. Stakeholder education is an important component of every lake management planning effort. Which of these subjects would you like to learn more about?

Answer Options	Response Percent	Response Count
How changing water levels impact Long Lake	58.5%	38
Aquatic invasive species impacts, means of transport, identification, control options, etc.	56.9%	37
How to be a good lake steward	50.8%	33
Enhancing in-lake habitat (not shoreland or adjacent wetlands) for aquatic species	38.5%	25
Ecological benefits of shoreland restoration and preservation	36.9%	24
Social events occurring around Long Lake	35.4%	23
Watercraft operation regulations - lake specific, local and statewide	23.1%	15
Volunteer lake monitoring opportunities (Clean Boats Clean Waters, Citizens Lake Monitoring)	21.5%	14
Not interested in learning more on any of these subjects	13.8%	9

Number	Response Text
1	Water quality is getting worse every year
2	I feel over the past few years, there seems to be more scum forming on the bottom of the lake. This fish seem to hide in this scum making fishing not as good as it used to be. The level of the scum seem to continue to grow, which I feel will impact the health of the lake if it is not monitored more closely.
3	We need to get the weeds under control. I cannot even get my boat out during the peak season without clearing my prop several times.
4	Thank you for all you're doing to help keep Long Lake a wonderful place for all to enjoy!
5	I do like seeing the weed patrol boat out trimming the weeds
6	who are you to Long Lake???
7	Almost never see fish, both along the shoreline and when on the water. Nothing like 10-15 years ago. Looks like there's not a fish in the lake! Clarity is pretty good except on weekends with the boat traffic and people coming too close to the shore. Too much boat traffic.
8	Keep up the god work! I am no longer a member of the fishing club!
9	The current LLPA has become a leader in trying to make the lake better for the property owners. I wish it would find a way to get more policing to enforce lake speeding rules.
10	I am in favor of aggressive, responsible control of weeds and invasive species. I have no concerns about what happened at Lake Ellwood affecting our lake.
11	I am answering this survey for my elderly mother based on what I believe her answers would be. Her primary residence was at Long Lake for almost 40 years. Over that time, her main concerns were the shoreline erosion and the thick weeds. During the last 15 years she lived there year round (1990- 2006) she did feel that the fishing wasn't as good as it had been in the past. I believe that the LLPA is doing a wonderful job in educating the property owners and working to protect and preserve the lake.
12	Seems that some areas of the lake get more attention than others (China Town), I don't believe the area around my property has been sprayed or harvested over the past two years, although the weed growth is significant.
13	There needs to be a boat patrol present on the weekends.
14	Mu;ch improvement over the last few years.
15	You can see a major difference between the areas that are treated and not treated. Keep up the treating.
16	My opinion, LLPA has and is doing a magnificent job. Thank you LLPA. Too bad we can not get more volunteers to help out.
17	Managing weed control by chemical herbicide on another lake for seven years I saw the negative effects on the spawning fish and decline of the ability of fishing public to catch fish. Contrary to the DNR and the chemical applicators it does effect fishing. Look at the ditch and channel during spring south of Title lake here, The fishing has declined. The crappie have moved to other areas.
18	20+ years ago, I could catch fish off of my pier. I could also get my boat in and out without plugging the motor with mud and weeds. Today it is awful. I, more than likely will not re-join the association again this year because of these problems. I would spend a lot more time at the lake if these conditions were taken care of and would also be willing to pay my share. BUT the mud and the lily pads, and the weeds must go. Because I am stating facts, I am willing to state my name. It is Mike Schuler and I live in the channel. Thank you for the opportunity to voice my opinion.
19	As a child I could jump off the end of the pier and swim, weeds make that impossible now. Also, there is so much muck you sink into. I am thankful that the LLPA is working to better the lake conditions.
20	I'm very pleased to see the pro-active approach the LLPA is taking to ensure the longer-term health of Long Lake. In the same breath, I'm disappointed that Town Government is not more actively involved given the taxes generated by the landowners. I'm also disappointed the State is not stepping up in a larger manner financially given the huge piece of frontage owned by the state combined with the public use of the Lake.

C

Annual Runoff Volume: 8144.2 acre-ft

Lake Surface Area <As>: 460 acre

Lake Volume <V>: 7237 acre-ft

Lake Mean Depth <z>: 15.7 ft

Precipitation - Evaporation: 3.1 in.

Hydraulic Loading: 8263.1 acre-ft/year

Areal Water Load <qs>: 18.0 ft/year

Lake Flushing Rate <p>: 1.14 1/year

Water Residence Time: 0.88 year

Observed spring overturn total phosphorus (SPO): 23.9 mg/m³

Observed growing season mean phosphorus (GSM): 20.5 mg/m³

% NPS Change: 0%

% PS Change: 0%
