CONDITION REPORT

*The local conditions necessitating this regulation is that a narrow channel connects the dam with the main portion of the Minong Flowage with. Because of the lack of state regulation and because of the danger of a boating accident, with boats traveling at a high rate of speed, this channel should be a "Slow - No Wake" area. At the present time, boats travel through this channel at a high rate of speed, creating an unsafe boating environment. This Ordinance would prevent boats from traveling in the channel at a high rate of speed and would protect public rights, interests and the capability of the water resource.*

*If this ordinance is not adopted, the impact on public health, safety or welfare could be great, creating a condition where the prospect of a boating accident is great.*
