REPLY TO THE ATTENTION OF

WW-16J

MAR 09 2010

Sharon Gayan, Director
Water Quality Bureau
Wisconsin Department of Natural Resources
101 S. Webster Street
Box 7921
Madison, Wisconsin 53707-7921

Dear Ms. Gayan:

The U.S. Environmental Protection Agency has conducted a complete review of the final Total Maximum Daily Loads (TMDLs) for the Milwaukee River Basin, including supporting documentation and follow up information. The Milwaukee River Basin is located in southeastern Wisconsin, in Dodge, Fond du Lac, Sheboygan, Ozaukee, Washington, Waukesha, and Milwaukee Counties. The TMDLs were calculated for total phosphorus, total suspended solids, and fecal coliform. The TMDLs address the impairment of aquatic recreational and aquatic life uses.

EPA has determined that these TMDLs meet the requirements of Section 303(d) of the Clean Water Act and EPA's implementing regulations at 40 C.F.R. Part 130. Therefore, EPA hereby approves Wisconsin's forty-four TMDLs in the Milwaukee River Basin. The statutory and regulatory requirements, and EPA's review of Wisconsin's compliance with each requirement, are described in the enclosed decision document. EPA also agrees that the protection measures outlined in the TMDL document for the remaining unimpaired waterbodies are sufficient to maintain the existing water quality. EPA agrees these measures are appropriate for consideration as "protection strategies" as described in the "Long-Term Vision for Assessment, Restoration, and Protection under the Clean Water Act Section 303(d) Program".

We wish to acknowledge Wisconsin's effort in submitting these TMDLs and protection strategies, addressing aquatic recreational and aquatic life uses, and look forward to future submissions by the State of Wisconsin. If you have any questions, please contact Mr. Peter Swenson, Chief of the Watersheds and Wetlands Branch, at 312-886-0236.

Sincerely,

A handwritten signature in black ink, appearing to read "Ch. Korleski". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Christopher Korleski
