

Suspected New AIS Discoveries Communication Protocol: Group B Taxonomic Experts List

This list is intended for use by Wisconsin Department of Natural Resources staff. It is an extension of and is intended to be used according to the Suspected New AIS Discoveries – Communication Protocol.

The individuals listed below have sufficiently completed the AIS Verification Test administered by the Statewide AIS Monitoring Lead, which includes the following common restricted species and easy-to-identify prohibited* species.

Individuals who score 75% or greater will be added to the verifier list for 1 year. Those who score 100% will be added to the verifier list for 5 years. Verifiers who scored 100% may retest annually if they prefer, but the verifier list will reflect only the most recent score (e.g., someone who scored 100% in 2023 and then 80% in 2024 will need to take the test again in 2025 to remain on the verifier list).

To enable more verifiers, scores have been split into species-specific groups of aquatic plants, wetland plants, and animals. Fish are not tested on this exam as we defer to the local fish biologist. Every occurrence requires two verifiers to agree.

Aquatic plants: Eurasian water milfoil (*Myriophyllum spicatum*), curly leaf pondweed (*Potamogeton crispus*), water lettuce (*Pistia stratiotes*)*, and water hyacinth (*Eichhornia crassipes*)*

Wetland plants: Japanese knotweed (*Fallopia japonica*), flowering rush (*Butomus umbellatus*), yellow iris (*Iris pseudacorus*) in flower only, and purple loosestrife (*Lythrum salicaria*)

Animals: Banded mystery snail (*Viviparus georgianus*), Chinese mystery snail (*Cipangopaludina chinensis*), rusty crayfish (*Orconectes rusticus*), and zebra mussel (*Dreissena polymorpha*)

Fish: If it is a fish, contact your [local fish biologist](#).

Consult Statewide AIS Monitoring Lead if further verification is needed, or for approval of verification by individuals not listed here. To verify all other species, please contact the AIS Monitoring Lead.
