CONDITION REPORT

The local conditions necessitating this regulation is that a narrow channel connects two portions of Beaver Dam Lake within the City of Cumberland. Because of the lack of state regulation and because of the danger of a boating accident, with boats traveling at a high rate of speed, this channel should be a "Slow - No Wake" area. At the present time, boats travel through this channel at a high rate of speed, creating an unsafe boating environment. This Ordinance would prevent boats from traveling in the channel at a high rate of speed and would protect public rights, interests and the capability of the water resource.

If this ordinance is not adopted, the impact on public health, safety or welfare could be great, creating a condition where the prospect of a boating accident is great.
