

Update From FLOW AIS
For Oconto County since 2-21-2022
3-21-2022

1. Completed and sent in Early Detection Response grant to the Wisconsin Department of Natural Resources.

Deliverables for grant include:

- Training Oconto and Marinette County technicians for the Clean Boats Clean Waters program
 - Presenting information for County departments (Land and Water, parks, forestry and highway departments) on European Frogbit and its impacts to Wisconsin's ecosystem in the FLOW AIS area.
 - Helping out with monitoring and hand removal of European Frogbit
 - Attending trainings put on by organizations outside of Wisconsin. In order to stay up to date on the most current Frogbit information
 - Participate in the planning of a field trip to a Frogbit site for the UMISC conference in October.
 - Help to complete deliverables set in the European Frogbit Management plan created by EFB collaborative group.
2. Participate in the Meet your Scientist Meetings of the Oconto County Lakes project Tuesday nights every week in March.
 3. Gathering and prepping Citizens Lake Monitoring Network supplies for the Oconto County Lake monitor Volunteers. A few supplies are still being sent to me. Once they are here. Supplies and data sheets will be sent out to the monitors or hand delivered by myself.
