

Healthy Lakes & Rivers Example Report

Grant Number: LPT72822

Grant Sponsor: Washburn County LWCD

Were all projects completed as proposed?

Yes

No

If no, explain the reasons for the change: The landowners either didn't have time to work on the project as expected or had un-foreseen circumstances occur and the project wasn't a priority.

Make sure you have completed the following requirements and keep them for your records, 10 years:

- A signed 10-year contract with each land owner
- Design specifications and location of each best practice

Optional: Tell us your story. We'd love to hear what worked, what didn't work, unique fish and wildlife observation, and your specific suggestions how we can improve Healthy Lakes & Rivers.

Explain any challenges you may have experienced and potential solutions to those challenges

The 2022 grant was our first extension we did. Everyone on the extension was happy to have had more time to complete the project in 2023. However, for differing reasons, all but 1 project participated in the Grant. Dick Howard who was amended as an "add on" did complete his project.

Having had such a smooth experience in 2021 with all but 1 landowner completing projects, I found it frustrating that landowners didn't complete their project with the extension.

Overall, the applicants that did participate, were happy with the outcome and were appreciative of the grant opportunity.

Healthy Lakes & Rivers Example Report

Property Owner Name: Dick Howard- Mathews Lake

Fish Sticks: Insert total number of completed fish sticks.

Number of Fish Sticks clusters installed: Number.

Total Number of trees: Number.

Native Planting: 1

Lakeshore Hillside

Drainage Area Diverted: Number.

Drainage Area Captured: Number. If uncertain: Choose an item.

Rock Infiltration: Insert total number of rock infiltrations.

Dimensions: Number.

Drainage Area Captured: Number.

Healthy Lakes & Rivers Example Report

Dick Howard July 2023 Before

Dick Howard July 2023 Before

Water was coming off roof and moved down the slight incline to lake. Planted natives to catch and slow the water and incorporated the planting into some existing vegetation by the lake. Wanted to add more diversity, than just ferns to hold the soil.
