Lake Wisconsin Access Inventory

Project Scope-

Columbia County Land and Water Conservation Department conducted a public access survey of the Columbia County side of Lake Wisconsin.

Methods -

Parcels were reviewed and inventoried using the Columbia County Parcel. All locations were visited, photographed and inventoried using a comprehensive attributes such as but not limited to: tax parcel, municipality, x and y coordinates, Pathway to water, Site description, Parking, boat launch, pier presence, handicap accessibility, lighting, buildings, and hours of operation. A geo database was created with attributes and geo-spatial photography linked to database.

Summary Results -

63 locations were inventoried. The Tables below are listed to of some of the attributes inventoried.

The type of access to the water was inventoried. As can be seen in Table 1 some lots are undeveloped with nothing more than a woodlot and no defined trail. Some lots have formal boat launches or dead end paved roads leading to the water's edge.
