

## **LMPN 8924 – Adams County’s Progress Report Meeting**

06/10/2024

Attendees: Keifer Sroka (Adams County) and Shelby Adler (WDNR)

Phragmites EDR Grant – has been going smoothly so far. Contractor is going out for second round of treatment in a few weeks.

Peppermill Lake – Knotweed Control on private. Haven’t found on any other property surrounding the lake. Landowner is not interested in using chemical application on the population. Will be doing cutting and tarping.

CBCW Boater Behavior Survey – 3 launches for Adams County

Hosted an aquatic plant identification workshop with great turn out

Making rounds to all the lake association meetings – looking at doing plant workshops at these associations’ annual meetings

Has a Project Red/Early Detection site list for this year. Working to train volunteers and work through list together.

Golden Sands (Mara Lince) joint work on backwaters of Castle Rock and Petenwell. Looking out for potential Purple Loosestrife and Flowering Rush. Seeing what power company is doing for invasive plants and how Adams County can assist.

Trained Tri-Lakes CBCW interns

CLMN Kick-off has been going good. Keifer does 2-3 lakes himself. But getting back to full capacity of volunteers.

Marco and Anna coming to help out with PI Surveys for Peppermill Lake (Patrick lake 2023 data was found) and Arkdale Lake

Snapshot Day planning is under way

Bait Shop Initiative and Pet Shop Visit (new tropical fish store in Adams County) planned for later this summer.

**This meeting served as Adams County’s LMPN Progress Report for 2024 as approved by Shelby Adler.**
