

Construction Dewatering Permitting Flow Chart

Revised August 1, 2023

Notes

1. Open R&R sites and closed R&R sites with continuing obligations can be found on the [Wisconsin Remediation and Redevelopment Database](#).
2. Dewatering well systems that have a combined pumping capacity of 70 gallons per minute (100,000 gallons per day) or more require a high capacity well approval. Please see the [High Capacity Well Application and Instructions](#) for more information.
3. Construction projects that will disturb one or more acres of land must also apply for coverage under the Construction Site Storm Water Runoff WPDES General Permit NO. WI-S067831 or, if under WisDOT supervision, must also apply for the WisDOT Construction Site Storm Water Runoff WPDES General Permit No. WI-S066796.
4. State statute 30.2022 exempts WisDOT from dewatering permits for projects accomplished in accordance with interdepartmental liaison procedures established under the [Cooperative Agreement Between WDNR and WisDOT](#). Please consult the appropriate [DNR Transportation Liaison](#).
