

# Previous Additive Reviews

EGAD #: 3200-2025-02

The products listed below are those for which additive reviews have previously been conducted. A completed review does not indicate that the product was approved at that time or should be approved in the future, only that a secondary value or allowable useage rate for the protection of aquatic life was calculated.

The allowble useage rates provided in the table below are for stormwater uses only, are based on toxicity alone, and do not indicate product effectiveness. If you are interested in receiving approval to use one of these products in a wastewater applicaiton, contact your permit drafter.

If new toxicity data becomes available, the secondary value may be recalculated.

*This list is current as of January 2025*

Product Trade Name	Product Manufacturer	Date	Allowable Rates for Stormwater Uses Only		
			Allowable Usage Rate (mg/L)		Allowable Application
			Acute	Chronic	Rate (lbs/acre-ft)
