

## Yellow Lake Lodge – Video Review 2010

Yellow Lake Lodge launch was the busiest launch for 2010 with 4,366 videos captured showing 529 launches or 12% of the activity. It also had the most potential violations identified, as well as the most cleanoffs. The violations were documented to the Sheriff and Burnett County Conservationist. There was a lightning strike occurring on 7/14 which damaged the camera, POE injectors, and radio. This took some time to resolve requiring help from NW Electric in mounting a new antenna on the pole. A new model camera was initially configured which did not capture discreet video files and so had to be replaced with a new camera based on the older model. The old speaker design was replaced with a larger speaker, but someone decided they didn't like the message and managed to tear the speaker loose from the housing. A new model speaker housing will be used next year. Most of the time bringing this I-LIDS back operational was donated by ESP. It is recommended that clean-off gift certificates be awarded to several of the identified boaters at this launch as shown in the report with green highlighting. ESP will provide these certificates to the Sheriff along with the registration numbers.

## Yellow Lake Jeffries Video Review - 2010

There were 2093 videos captured at Jeffries with 286 of these being launches. In contrast to 2007 and 2008, there were no violations seen. This is encouraging as there are a lot of boats coming from Minnesota where Eurasian watermilfoil and zebra mussels are more prevalent. There was no damage to the speaker on the recorded message at Jeffries and people were well aware of the message during casual conversations.

Unfortunately there were several outages at Jeffries in part due to the solar power on the pole. We tried to address these when we were in the area so not to charge for a special trip. One of the longer outages was probably due to lightning. Another power surge impacted the board which was replaced at no charge. Another outage was due to the wireless access point going down. All issues were resolved and the final charge for the season will show a credit for excessive outages.

All videos were reviewed and there are several videos showing that users are hearing the message and cleaning off boats as a result. The interns at the boat launch made a difference in educating boaters as well. We will use statistics below to focus manpower resources at peak periods of use next year.

## Yellow Lake Ike Walton Video Review 2010

Ike Walton launch was as in previous years the least busy of the all the launches with a lot of folks driving thru without a boat or trailer. However despite the low number of launches (approximately 100) there were 1158 videos captured. Fortunately, no violations were seen. Some of this was due to the movement of clouds and lightning. See notes on videos in the report. Unfortunately the speaker was torn off of this I-LIDS later in the fall. Recommendation is to have limited intern time at this launch due to the risk but when they are here to spend time early in the morning on Saturday or Sunday, and then again between 2-4pm.
