2014 Proposed Watershed Monitoring Projects

Project Details

Project ID Proposed_Projects
Start Date 01/01/2014

Description Proposed Projects for the calendar year 2014 year. As appropriate, add macroinvertebrate samples needed.

Outcome Unfunded 2008, 2009, 2010, 2011, 2012, and 2013 proposals are located in the Proposed Projects Archive. Email Ruth Person if you would like to make those proposals again for 2014. (You do not have to retype the proposal, I will just assign it a new project ID and parent project). You will have to update the budget and any other details that may have changed from the first proposal. Funded Projects were moved to impaired waters or special projects folders. When your project starts please remember to add your stations and VERIFY the lab account code.

Click on black arrow to navigate to sub-projects

Purpose

A general description of the who, what, when, where, and how for the project.

Fill this in.

Project Objective

Why is the project necessary and what management question is to be addressed? Describe the specific information for the sites to be addressed as part of the project. In providing this information, include the number of sampling locations, the WBIC of the water bodies to be sampled, and other relevant information.

Fill this in.

Project Outcome

Provide a summary sentence describing the project outcome. Identify project deliverables.

Fill this in.

The Office of
101 S. W

Getting lab account codes (to make labslips) for projects with State Lab of Hygiene analysis

Preferable Timeline

1-4 months ahead of time

Lab Account Procedure:

- Communicate with Ron Arneson early on, even before project approval if you know it is going to eventually be approved.
- Ron requests the account through LIMS.

“Lynn: Please setup a new account on LIMS for the following.

Title: NC STRATIFIED SITES

Department: Inorganic

Total: BA0 \$4000

Fee Schedule: 1

Account Code: WT146

Data: No USGS

Start Date: Now

End Date: 12/31/2011”

- Ron sends us an email that it has been added to LDES
“It has been added to LDES.”
- Now add the new lab account codes to the projects in SWIMS
- If it is a ‘rush’ and labslips need to be generated very soon, email Brian Tinberg and have him refresh SWIMS

Hints:

1. If you've generated scheduled labslips with the wrong lab account code or no lab account code, we just need to reprint them (NOT regenerate them!). Project Details → Labslips → Change code in each labslip and type ‘Reprint’ in Field ID so that the biologist knows to reprint those.

The screenshot displays the 'Wisconsin Department of Natural Resources Surface Water Integrated Monitoring System (SWIMS)' interface. The 'Query Resources of Interest (ROIs)' form is the central focus, with a 'Submit' button highlighted. A yellow tooltip box provides instructions: 'Click Associate a Resource of Interest. Enter any that are applicable. Click Submit. Click Next.' The interface also shows a navigation menu at the top with 'Resources of Interest' highlighted, and a 'Next' button in the left sidebar.
