

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: ACEI-018-06

Name: WHITE RIVER LAKE MANAGEMENT DISTRICT: White R. Flowage EWM & CLP Control Project

Type: Aquatic Invasives Grant

Subtype: Aquatic Invasives Control

Status: COMPLETE

Start Date: 4/1/2006

End Date: 12/31/2008

Purpose: The White River Flowage District proposes to control curly-leaf pondweed (CLP) and Eurasian water-milfoil (EWM) through chemical treatment and preventative measures in White River Flowage during the period 2006 - 2008. The project elements and deliverables are specified in White River Flowage District's Aquatic Invasive Species Grant application, dated November 9, 2005. The project includes conducting pre-treatment surveys annually to monitor the extent of CLP and EWM and efficacy of the previous year's treatment; treating CLP and EWM infested areas with aquatic herbicides; and conducting education and prevention activities to prevent further AIS infestations, including placing articles in a local newspaper and conducting watercraft inspections. Watercraft inspection records will be entered into the State's online Watercraft Inspection Database. Annual progress reports and a final report summarizing the three-year project will be provided to DNR.

If consultant is to provide the final report, it is recommended the Grantee provide the DNR Aquatic Invasive Species Coordinator with a draft for comment on report adequacy prior to making final payment to the consultant. DNR to receive both paper and electronic .pdf copies of the final report along with, or prior to, submission of grantee's final payment request.

Objective:

Comments: Grantee is WHITE RIVER LAKE MANAGEMENT DISTRICT
