

## Wisconsin Department of Natural Resources SWIMS Project Summary

### General Project Information

**Project ID:** LPL-061 (6004-1)

**Name:** ISLAND CHAIN OF LAKES MGNT DIST: Island Chain O Lakes Water Quality Monitoring & Analysis

**Type:** Lakes Grant

**Subtype:** Large Scale Lake Planning

**Status:** COMPLETE

**Start Date:** 4/12/1991

**End Date:** 2/28/1992

**Purpose:** 1) Conduct water quality monitoring as specified in the application. 2) Collect and analyze 5 inflow samples as described in the application.3) Conduct a synoptic bacterial survey as specified in the application. 4) Summarize water quality information and evaluate lake's trophic status.5) Develop technical report analyzing water quality and trophic status, and develop non-technical report summarizing information for the public.6) Disseminate information to the public through newsletter mailings, public meetings, and summary and entire report mailings.

**Objective:**

**Comments:**

**Outcome:**

**Study Design:**

**QA Measures:**

Summary Report - Wisconsin DNR Lakes Planning Grant - Island Chain of Lakes	The Island Chain is a popular set of lakes used extensively for recreation. The study of the lakes funded by a Wisconsin Department of Natural Resources Lakes Planning Grant was designed to analyze and report on three main issues concerning water quality. These issues were: 1. nutrient concentrations in the lakes; 2. concentrations of fecal coliform bacteria in shoreline areas; and 3. current trophic status and algal populations found in the lakes.	David F. Brakke	1/6/1992
