

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPL-346

Name: FOREST LAKE IMPROVEMENT ASSOCIATION: Forest Lake Eurasian Watermilfoil Eradication Study

Type: Lakes Grant

Subtype: Large Scale Lake Planning

Status: COMPLETE

Start Date: 4/1/1996

End Date: 12/31/1998

Purpose: The Forest Lake Improvement Association proposes to expand a research project involving submersible frame assemblies to eradicate Eurasian Watermilfoil. Project activities will include treatment of an area of Eurasian Watermilfoil followed by transplanting area treated with native aquatic plants. The project will include 400 hours of donated labor (\$2,000) as part of the local cost share. A final report will be prepared detailing 1) the methodology used, including construction design, time required for execution, application of screen and plant units, transplanting methods, 2) results obtained, including pre and post treatment plant species and densities (stem density) on test plots, 3) site descriptions, including depth and sediment type in test plots, and 4) problems encountered and recommendations to improve the overall process. A paper copy and an electronic copy of the final report will be provided to the Department of Natural Resources. Information about the project's results will be disseminated to the public by newsletter, entire report mailing, and public meeting. end.
