

Wisconsin Department of Natural Resources
SWIMS Project Summary

General Project Information

Project ID:

LPT-154-01

Name:

LITTLE GREEN LAKE P & R DISTRICT: RES-Little Green Lake Destratification Project

Type:

Lakes Grant

Subtype:

Lake Protection Grant

Status:

COMPLETE

Start Date:

9/1/2000

End Date:

6/30/2003

Purpose:

The Little Green Lake Protection & Rehabilitation District proposes to install a circulation system consisting of compressors, air delivery lines, filter system, and a housing structure. The circulation system is designed to ensure sufficient oxygen concentrations in the deep-water areas of the lake. Oxygen in deep-water areas of the lake will reduce the release of phosphorous from the lake sediment and decrease the level of lake fertilization. This will result in improved water clarity and algae conditions thereby improving water quality conditions for recreation and aesthetics.

Local resources to be provided include volunteer services during installatiotn, volunteer services regarding project management, and financial contribution from Green Lake County.

The project deliverables will include design and installation of a system of compressors and airline sufficient to circulate lake water in the deepest portions of the lake generally greater than 15 feet; report of evaluation monitoring of lake nutrient and mixing conditions after the system becomes operational; and, conduct pre and post operation public informational meetings and prepare fact sheets (current lake conditions, descriptions of circ system, goals/benefits/ecological effects).

Objective:

Comments:

Grantee is LITTLE GREEN LAKE P & R DISTRICT

Outcome:
