Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: LPL-585

Name: UPPER ST CROIX LAKE ASSOCIATION: Surface and Groundwater Hydro. Study, for St. Croix Lakes

Type: Lakes Grant

Subtype: Large Scale Lake Planning

Status: COMPLETE

Start Date: 10/1/1998 **End Date:** 12/31/2000

Purpose: The Upper St. Croix Lake Association and the St. Croix Flowage Association are proposing a joint project to study the

meteorilogical, hydrologic, and wetland ecosystem characteristics of the Upper Lake St. Croix and St. Croix Flowage

wateshed that will provide a framework for establishing a long-term study that quantifies the water budget (inflow, outflow, and

storage components) of the watershed hydrologic system.

Specific deliverables for this project will include a project report, community presentations and an educational outreach program for local lake associations and community/school groups that focuses on the hydrologic cycle as a dynamic

component of the Northland environment.

The Department of Natural Resources will be provided with both a paper copy and an electronic copy of the final report. The

project results will be disseminated to the public by newsletter(s), public meeting(s), and local newspaper articles.
